Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

PETITION UNDER 37 CFR 1.183 FOR WAIVER OR SUSPENSION OF RULES

Commissioner for Patents:

I. Preliminary comments

This present petition under 37 CFR 1.183 is being filed contemporaneously with a separate petition under 37 CFR 1.47(a). This present petition under 37 CFR 1.183 is being filed to request waiver of the requirement for all inventor signatures in a Rule 131 declaration, while the other petition under 37 CFR 1.47(a) is being filed because at least some of the inventors either refuse to execute an application (including inventor declarations) for patent or cannot be found or reached after diligent effort.

If appropriate, the U.S. Patent Office is kindly requested to consider reviewing these two petitions in tandem or otherwise consider consolidating the processing of the two petitions.

These two petitions, the Rule 131 declarations signed by the available inventors, and a request and related papers under 37 CFR 1.48(a) to delete an inventor are being filed together herewith along with an amendment/response to an Office Action mailed on February 28, 2011.

II. Background information

By way of background for the present petition under 37 CFR 1.183, the Office Action for the present application was mailed on February 28, 2011. During the course of preparing a response, it was decided to prepare Rule 131 declarations to address the rejection(s) set forth in the Office Action. During the course of preparing the Rule 131 declarations and obtaining inventor signatures for the Rule 131 declarations, it was determined that Ellen F. Butler (now Ellen F. Butler Patterson) should be deleted as an inventor.

In accordance with 37 CFR 1.48(a), a new inventor declaration (omitting Ellen F. Butler Patterson) was therefore prepared and sent to the inventors (Vincent Tong, Kamal Acharya, Matthew Crampton, Peter Gremett, and Srinivas Lingutla), along with copies of other application papers. Executed inventor declarations have now been received from inventors Peter Gremett and Srinivas Lingutla. Executed inventor declarations have not been received from inventors Vincent Tong, Kamal Acharya, and Matthew Crampton. Accordingly, the petition under 37 CFR 1.47(a) is being filed contemporaneously herewith to request that the signing inventors be permitted to file inventor declarations on behalf of themselves and the signing inventors.

The present petition under 37 CFR 1.183 is being filed to request waiver of the requirements for the signatures of non-signing inventors Vincent Tong, Kamal Acharya, and Matthew Crampton on the Rule 131 declaration, such that Rule 131 declarations executed by inventors Peter Gremett and Srinivas Lingutla can be fully entered and considered compliant.

III. Proof of the pertinent facts

The undersigned attorney (Dennis M. de Guzman, Reg. No. 41,702) has power of attorney in the present application, and has conducted at least some of the activities described

below to contact the inventors or has directed and supervised attorney Davin K. Chin (Reg. No. 58,413) in conducting the activities to contact the inventors.

Detailed below (with reference to attached exhibits of documentary evidence) are the activities that were conducted to reach the inventors, including non-signing inventors Vincent Tong, Kamal Acharya, and Matthew Crampton.

A. Executed Rule 131 declarations of inventors Peter Gremett and Srinivas Lingutla

Executed Rule 131 declarations of inventors Peter Gremett and Srinivas Lingutla have been obtained and are being filed contemporaneously herewith in response to the Office Action mailed February 28, 2011. Ellen F. Butler (now Ellen F. Butler Patterson) is not included in the Rule 131 declarations in view of the request under 37 CFR 1.48(a) filed concurrently herewith to delete her as an inventor in the present application.

B. Vincent Tong

The last known address of Vincent Tong is 34734 Williams Way, Union City, CA 94587-5578.

This address was obtained through a public records search (Exhibit W) performed by our law firm's research department. Page 1 of Exhibit W shows inventor Tong's street address at 34734 Williams Way in Union City, CA. Page 1 of Exhibit W further shows a telephone number at 510-487-1482. On May 19, 2011, attorney Chin called this telephone number and spoke with a man who identified himself as Vincent Tong. The person confirmed that he was previously with AOL (the previous assignee of the present application) and that he was a named inventor on the present application. Inventor Tong also confirmed his mailing address of 34734 Williams Way, Union City, CA 94587-5578 and provided an email address of vincent@vincenttong.com.

On May 20, 2011, attorney Chin sent inventor Tong an email requesting him to review and sign a Rule 131 declaration (including reviewing its accompanying supporting exhibits), along with a copy of the publication of the present application, which were attached in the email. Executed papers from inventor Tong have not been received.

In a transmittal letter dated May 23, 2011, attorney Chin sent inventor Tong a packet via UPS (with tracking confirmation) having the transmittal letter, a Rule 131 declaration and its supporting exhibits, and a copy of the publication of the present application, with all requested to be reviewed by inventor Tong. UPS tracking information shows that the packet was delivered to inventor Tong's address on May 25, 2011. Executed papers from inventor Tong have not been received.

In a transmittal letter dated July 12, 2011, attorney Chin sent inventor Tong another packet via UPS (with tracking confirmation) having the transmittal letter, a new Rule 131 declaration and its supporting exhibits, and a copy of the publication of the present application, with all requested to be reviewed by inventor Tong. UPS tracking information shows that the packet was delivered to inventor Tong's address on July 13, 2011. Executed papers from inventor Tong have not been received.

On or about July 15, 2011, the undersigned attorney and attorney Chin determined that the inventorship in the present application should be revised, to delete Ellen F. Butler Patterson as an inventor. Accordingly in a transmittal letter dated July 20, 2011, attorney Chin sent inventor Tong a packet via UPS (with tracking confirmation) having the transmittal letter, a new inventor declaration (copy attached herewith), and a copy of the publication of the present application and amendments that were made during prosecution (copies not included herewith, since such documents are available in the file wrapper of the present application), with all requested to be reviewed by inventor Tong. UPS tracking information shows that the packet was delivered on July 25, 2011. Executed papers from inventor Tong have not been received.

In a transmittal letter dated August 1, 2011, attorney Chin sent inventor Tong a packet via UPS (with tracking confirmation) having a transmittal letter, another copy of the new inventor declaration, another copy of the publication of the present application and amendments that were made during prosecution (copies not included herewith, since such documents are available in the file wrapper of the present application), and a Rule 131 declaration and its supporting exhibits, with all requested to be reviewed by inventor Tong. The transmittal letter informed inventor Tong that a failure to respond may be considered to be a refusal to sign the declarations. UPS tracking information shows that the packet was delivered on August 2, 2011. Executed papers from inventor Tong have not been received.

On August 22, 2011, the undersigned attorney called and left a voicemail message at inventor Tong's telephone number 510-487-1482, requesting inventor Tong to provide an update as to whether and when he would be able to complete his review and execution of the papers sent to him. Inventor Tong did not return the undersigned attorney's voicemail message.

Accordingly, it is respectfully submitted that inventor Tong's failure to return an executed Rule 131 declaration, as evidenced by his non-return of the papers sent to him as detailed above, by his non-return of the undersigned attorney's telephone call, and by his being informed that a failure to respond may be considered to be a refusal, constitutes an actual or constructive refusal to review and execute the Rule 131 declaration or otherwise join in the present application.

Exhibit X shows copies of the correspondence sent to inventor Tong, the UPS tracking information, the inventor declaration, and the Rule 131 declaration and its supporting exhibits A-T. For the sake of brevity, copies of certain documents are not provided herewith, such as the copies of the application and prosecution documents (which are available in the file wrapper of the present application), duplicate copies of documents sent to inventor Tong, etc.

B. Matthew Crampton

The last known addresses of Matthew Crampton are Gigwalk, 1931 Old Middlefield Way, Mountain View, CA 94043 and 841 West California Avenue, Unit C, Sunnyvale, CA 94086.

The Sunnyvale, CA address was obtained through the public records search (shown in Exhibit 1) performed by our law firm's research department. Page 5 of Exhibit 1 shows inventor Crampton's street address at 841 West California Avenue, Unit C, Sunnyvale, CA 94086. Pages 5-6 of Exhibit 1 further shows telephone numbers at 415-552-7153, 650-937-5989, and 408-738-6970. On May 19, 2011, attorney Chin called the telephone numbers 415-552-7153 and 650-937-5989 and discovered that they were disconnected. On May 19, 2011, attorney Chin called telephone number 408-738-6970 and received an automated message that the mailbox was full.

After doing some Internet searching using Google, attorney Chin was able to locate a website www.mattcrampton.com and a Linked-In page for inventor Crampton, from

which attorney Chin was able to obtain the Gigwalk contact information and the email address matt@mattcrampton.com.

On May 23, 2011, attorney Chin sent inventor Crampton an email (to his email addresses at matt@mattcrampton.com and matt@gigwalk.com) requesting him to review and sign a Rule 131 declaration (including reviewing its accompanying supporting exhibits), along with a copy of the publication of the present application, which were attached in the email.

In a transmittal letter dated May 23, 2011, attorney Chin sent inventor Crampton a packet via UPS (to his Mountain View and Sunnyvale addresses above, with tracking confirmation) having the transmittal letter, a Rule 131 declaration and its supporting exhibits, and a copy of the publication of the present application, with all requested to be reviewed by inventor Crampton. UPS tracking information shows that the packets were delivered on May 25 and May 26, 2011.

In a transmittal letter dated July 12, 2011, attorney Chin sent inventor Crampton another packet via UPS (to his Mountain View and Sunnyvale addresses above, with tracking confirmation) having the transmittal letter, a new Rule 131 declaration and its supporting exhibits, and a copy of the publication of the present application, with all requested to be reviewed by inventor Crampton. UPS tracking information shows that the packets were delivered on July 13, 2011.

On or about July 15, 2011, the undersigned attorney and attorney Chin determined that the inventorship in the present application should be revised, to delete Ellen F. Butler Patterson as an inventor. Accordingly an a transmittal letter dated July 20, 2011, attorney Chin sent inventor Crampton a packet via UPS (to his Mountain View and Sunnyvale addresses above, with tracking confirmation) having the transmittal letter, a new inventor declaration (copy attached herewith), and a copy of the publication of the present application and amendments that were made during prosecution (copies not included herewith, since such documents are available in the file wrapper of the present application), with all requested to be reviewed by inventor Crampton. UPS tracking information shows that the packets were delivered on July 22, 2011. An executed inventor declaration from these packets has not been received from inventor Crampton.

On or about July 25, 2011, the undersigned attorney and attorney Chin received an executed Rule 131 declaration from inventor Crampton. This executed Rule 131 declaration was the document sent to inventor Crampton on May 23, 2011.

On July 25, 2011, attorney Chin sent inventor Crampton an email (to his email addresses at matt@mattcrampton.com and matt@gigwalk.com) requesting him to review and execute the (new) Rule 131 declaration (sent on July 12, 2011) and the inventor declaration (shipped on July 21, 2011) and the accompanying documents. No response to this email has been received.

In a transmittal letter dated August 1, 2011, attorney Chin sent inventor Crampton a packet via UPS (to his Mountain View and Sunnyvale addresses above, with tracking confirmation) having the transmittal letter, another copy of the new inventor declaration, another copy of the publication of the present application and amendments that were made during prosecution (copies not included herewith, since such documents are available in the file wrapper of the present application), and a Rule 131 declaration and its supporting exhibits, with all requested to be reviewed by inventor Crampton. The transmittal letter informed inventor Crampton that a failure to respond may be considered to be a refusal to sign the declarations. A UPS tracking confirmation email shows that the packets were delivered on August 2, 2011. Executed papers from inventor Crampton from these packets have not been received.

On August 22, 2011, the undersigned attorney sent inventor Crampton an email (to his email addresses at matt@mattcrampton.com and matt@gigwalk.com) requesting him to review and execute the Rule 131 declaration and the inventor declaration and the accompanying documents, which were sent to him on July 25, 2011 and August 1, 2011. No response to this email has been received.

On August 22, 2011, the undersigned attorney called and left a voicemail message at inventor Crampton's telephone number 408-738-6970, requesting inventor Crampton to provide an update as to whether and when he would be able to complete his review and execution of the papers sent to him. Inventor Crampton did not return the undersigned attorney's voicemail message.

Accordingly, it is respectfully submitted that inventor Crampton's failure to return an executed Rule 131 declaration, as evidenced by his non-return of the papers sent to him

as detailed above, by his non-return of the telephone call and emails, and by his being informed that a failure to respond may be considered to be a refusal, constitutes an actual or constructive refusal to review and execute the Rule 131 declaration or otherwise join in the present application.

Exhibit Y shows copies of the correspondence sent to inventor Crampton, the UPS tracking information, the inventor declaration, and the Rule 131 declaration and its supporting exhibits A-T. For the sake of brevity, copies of certain documents are not provided herewith, such as the copies of the application and prosecution documents (which are available in the file wrapper of the present application), duplicate copies of documents sent to inventor Crampton, etc.

C. Kamal Acharya

The last known address of Kamal Acharya is 675 Distel Drive, Los Altos, CA 94022-1502.

This address was obtained through the public records search (shown in Exhibit 1) performed by our law firm's research department. Page 10 of Exhibit 1 shows inventor Acharya's street address at 675 Distel Drive, Los Altos, CA 94022-1502. Page 1 of Exhibit 1 further shows a telephone number at 650-906-0570.

In a transmittal letter dated May 23, 2011, attorney Chin sent inventor Acharya a packet via UPS (with tracking confirmation) having the transmittal letter, a Rule 131 declaration and its supporting exhibits, and a copy of the publication of the present application, with all requested to be reviewed by inventor Acharya. UPS tracking information shows that the packet was delivered to inventor Acharya's address on May 25, 2011. Executed papers from inventor Acharya have not been received.

In a transmittal letter dated July 12, 2011, attorney Chin sent inventor Acharya another packet via UPS (with tracking confirmation) having the transmittal letter, a new Rule 131 declaration and its supporting exhibits, and a copy of the publication of the present application, with all requested to be reviewed by inventor Acharya. UPS tracking information shows that the packet was delivered to inventor Acharya's address on July 13, 2011. Executed papers from inventor Acharya have not been received.

On or about July 15, 2011, the undersigned attorney and attorney Chin determined that the inventorship in the present application should be revised, to delete Ellen F. Butler Patterson as an inventor. Accordingly in a transmittal letter dated July 20, 2011, attorney Chin sent inventor Acharya a packet via UPS (with tracking confirmation) having the transmittal letter, a new inventor declaration (copy attached herewith), and a copy of the publication of the present application and amendments that were made during prosecution (copies not included herewith, since such documents are available in the file wrapper of the present application) , with all requested to be reviewed by inventor Acharya. UPS tracking information shows that the packet was delivered on July 22, 2011. Executed papers from inventor Acharya have not been received.

In a transmittal letter dated August 1, 2011, attorney Chin sent inventor Acharya a packet via UPS (with tracking confirmation) having the transmittal letter, another copy of the new inventor declaration, another copy of the publication of the present application and amendments that were made during prosecution (copies not included herewith, since such documents are available in the file wrapper of the present application), and a Rule 131 declaration and its supporting exhibits, with all requested to be reviewed by inventor Acharya. The transmittal letter informed inventor Acharya that a failure to respond may be considered to be a refusal to sign the declarations. UPS tracking information shows that the packet was delivered on August 2, 2011. Executed papers from inventor Acharya have not been received.

On August 22, 2011, the undersigned attorney called and left a voicemail message at inventor Acharya's telephone number 650-906-0570, requesting inventor Acharya to provide an update as to whether and when he would be able to complete his review and execution of the papers sent to him. Inventor Acharya called back and left a voicemail for the undersigned attorney, indicating that he did receive the papers sent to him but would not be able to review the papers, due to his busy schedule and other projects that have higher priority.

Accordingly, it is respectfully submitted that inventor Acharya's failure to return an executed Rule 131 declaration, as evidenced by his non-return of the papers sent to him as detailed above, by his voicemail left for the undersigned attorney, and by his being informed that a failure to respond may be considered to be a refusal, constitutes an actual or constructive refusal to execute the Rule 131 declaration or otherwise join in the present application.

Exhibit Z shows copies of the correspondence sent to inventor Acharya, the UPS tracking information, the inventor declaration, and the Rule 131 declaration and its supporting exhibits A-T. For the sake of brevity, copies of certain documents are not provided herewith, such as the copies of the application and prosecution documents (which are available in the file wrapper of the present application), duplicate copies of documents sent to inventor Acharya, etc.

IV. Conclusion

In view of the above, it is respectfully submitted that the evidence accompanying this petition demonstrates that all non-signing inventors refuse to join the application and/or cannot be found or reached after diligent effort for at least the purpose of reviewing and executing the Rule 131 declaration. This petition is accompanied by the fee set forth in 37 CFR 1.17(f). Therefore, it is believed that all requirements of 37 CFR 1.183 are met by this petition.

Accordingly, it is kindly requested that this petition be favorably considered and granted, so as to suspend or waive the requirement for all inventor signatures in the Rule 131 declaration.

The Director is authorized to charge any additional fees due by way of this response, or credit any overpayment, to our Deposit Account No. 500393.

Respectfully submitted,
Schwabe, Williamson & Wyatt

Important: The Public Records and commercially available data sources used on reports have errors. Data is sometimes entered poorly, processed incorrectly and is generally not free from defect. This system should not be relied upon as definitively accurate. Before relying on any data this system supplies, it should be independently verified. For Secretary of State documents, the following data is for information purposes only and is not an official record. Certified copies may be obtained from that individual state's Department of State. The criminal record data in this product or service may include records that have been expunged, sealed, or otherwise have become inaccessible to the public since the date on which the data was last updated or collected.

Accurint does not constitute a "consumer report" as that term is defined in the federal Fair Credit Reporting Act, 15 USC 1681 et seq. (FCRA). Accordingly, Accurint may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or another permissible purpose under the FCRA.

Your DPPA Permissible Use: Civil, Criminal, Administrative, or Arbitral Proceedings

Your GLBA Permissible Use: Fraud Prevention or Detection

Note: The "possible relatives" listed here have not been confirmed.

Re: Method and System for Integrated Online and Brick and Mortar Provider Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by June 3, 2011

Dear Mr. Tong:

Thank you for your time yesterday to discuss the declaration that is now enclosed with this letter. As we discussed, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which originally filed by AOL with you listed as an inventor. This application is rejected and we believe that we can overcome the rejection by establishing conception and reduction to practice of this invention by Oct. 23, 2000. As you may recall, you assisted in a similar process, in late 2005, to establish that this invention was conceived and reduced to practice prior by April 27, 2001.

I have attached a copy of a new declaration, copies of Exhibits A-T (which are referred to by the new declaration – and also by the 2005 declaration), and a copy of the publication of this patent application.

Please review these materials including all information on the new Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the new declaration in blue ink and return the signed declaration to us. We are enclosing, with the UPS copy of this letter, a pre-addressed envelope for returning the original document to my office. The declaration should be signed with your first name and last name as set forth in

the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declaration has been signed, please return it to my office in the enclosed pre-addressed envelope. Please also fax the signed Declaration to (206) 292-0460, or scan and email the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by **June 3, 2011**.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,

Davin Chin

Re: Method and System for Integrated Online and Brick and Mortar Provider
Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by July 29, 2011

Dear Mr. Tong:

As you know, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which was originally filed by AOL with you listed as an inventor.

During our handling of the declaration discussed in our prior letter of July 12, 2011, we learned from Ms. Ellen Butler Patterson that she should not have been listed as an inventor on this patent application. Accordingly, it would be appropriate for us to file a new Declaration establishing the correct inventorship of this application.

I have thus attached a copy of a new declaration, a copy of the publication of this patent application; and copies of the amendments of (a) October 18, 2002; (b) September 23, 2003; (c) January 20, 2004; (d) October 4, 2004; (e) April 20, 2006; (f) August 9, 2006; (g) July 17, 2008; (h) December 19, 2008; (i) July 17, 2009; and (j) April 27, 2010). I have also included a return envelope which you may use to return the signed declaration to my office.

Please review these materials including all information on the new Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the new declaration in blue ink and return the signed declaration to us. The declaration should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

July 20, 2011

Page 2

Once the declaration has been signed, please return it to my office in the enclosed pre-addressed envelope. Please also **fax** the signed Declaration to (206) 292-0460, or scan and **email** the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by **July 29, 2011**.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

(City, State) (Country)

Post Office Address: 20 Meadow Ridge Drive, Pittsfield, MA 01201

Title 37, Code of Federal Regulations, Section 1.56
Duty to Disclose Information Material to Patentability

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct.

The Office encourages applicants to carefully examine:

(1) Prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) The closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a *prima facie* case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability.

A *prima facie* case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) Each inventor named in the application;

(2) Each attorney or agent who prepares or prosecutes the application; and

(3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

Re: Method and System for Integrated Online and Brick and Mortar Provider Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by Aug. 10, 2011

Dear Mr. Tong:

As you know, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which was originally filed by AOL with you listed as an inventor.

We previously sent you a package on July 12, 2011 which included a declaration under 37 CFR 1.131 to establish dates of conception, reduction to practice, and diligence in reducing the invention to practice ("the 131 Declaration"). The July 12, 2011 package also included copies of Exhibits A-T (which are referred to by the 131 Declaration), a copy of the publication of this patent application, and a return envelope.

On July 20, 2011 we also sent you an Inventorship Declaration along with a copy of the publication of this patent application and copies of the amendments of (a) October 18, 2002; (b) September 23, 2003; (c) January 20, 2004; (d) October 4, 2004; (e) April 20, 2006; (f) August 9, 2006; (g) July 17, 2008; (h) December 19, 2008; (i) July 17, 2009; and (j) April 27, 2010; as well as a return envelope.

Unfortunately, we have not yet received your response to either of these packages. We are thus sending additional copies of the 131 Declaration, Inventorship Declaration, and above-listed supporting documents along with a return envelope which you can use to return the signed 131 Declaration and Inventorship Declaration to my Office. However, if this letter and your

Aug. 1, 2011

Page 2

response to the July 12 and July 20 packages have crossed paths in transit, please disregard the enclosed materials. We would, however, appreciate a call or email to let us know that the Declarations are in transit.

Please review these materials including all information on the 131 Declaration and Inventorship Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the declarations. The declarations should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declarations have been signed, please return them to my office in the enclosed pre-addressed envelope. Please also fax the signed Declaration to (206) 292-0460, or scan and email the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by Aug. 10, 2011. Please note that failure to respond may be considered a refusal to sign these declarations.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

Enclosures as noted

UPS CampusShip: View/Print Label

1. **Print the label(s):** Select the Print button on the print dialog box that appears. Note: If your browser does not support this function select Print from the File menu to print the label.
2. **Fold the printed label at the solid line below.** Place the label in a UPS Shipping Pouch. If you do not have a pouch, affix the folded label using clear plastic shipping tape over the entire label.

3. GETTING YOUR SHIPMENT TO UPS

Customers without a Daily Pickup

Schedule a same day or future day Pickup to have a UPS driver pickup all your CampusShip packages.

Hand the package to any UPS driver in your area.

Take your package to any location of The UPS Store®, UPS Drop Box, UPS Customer Center, UPS Alliances (Office Depot® or Staples®) or Authorized Shipping Outlet near you. Items sent via UPS Return Services(SM) (including via Ground) are also accepted at Drop Boxes. To find the location nearest you, please visit the Resources area of CampusShip and select UPS Locations.

Customers with a Daily Pickup

Your driver will pickup your shipment(s) as usual.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:
Acharya et al.

Application No.: 09/975,831

Filed: October 11, 2001

Art Unit: 3625

For: **METHOD AND SYSTEM FOR
INTEGRATED ONLINE AND BRICK AND
MORTAR PROVIDER SHOPPING**

Examiner: Brandy A. Zukanovich

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION OF VINCENT M. TONG UNDER 37 CFR 1.131

I, Vincent M. Tong, declare and state that:

1. I am a co-inventor of the subject matter of the above-referenced U.S. Patent Application (the "application"). I make this declaration to establish:

- (A) conception of the subject matter of the application, in the United States, prior to October 16, 2000,
- (B) actual reduction of practice of the subject matter of the application, in the United States, prior to May 4, 2001, and
- (C) diligence in actually reducing the subject matter of the application to practice, in the United States, from prior to December 22, 2000, through the actual reduction to practice of the subject matter of this application prior to May 4, 2001.

2. I contributed to the conception of the subject matter of the application prior to October 16, 2000. As evidence of this conception, I refer to the following exhibit:

EXHIBIT A:

Powerpoint presentation, Shop@Anywhere Episode 2: Online/Offline
Integration *Code Name: Yoda*, October 16, 2000.

3. I have reviewed the above-referenced EXHIBIT A and believe that it is of such character and weight as to establish conception of the subject matter of the application prior to October 16, 2000.

4. I contributed to the actual reduction of practice of the subject matter of the application prior to May 4, 2001. As evidence of this actual reduction to practice, I refer to the following exhibits:

EXHIBIT B:

Product Requirements Document (PRD): Shop@Anywhere Bullet –
Online/Offline Integration <*Code Name: Yoda*> [Release 1.0], October 23, 2000;

EXHIBIT C:

Email from Srinivas Lingutla to Kamal Acharya; February 2, 2001;

EXHIBIT D:

Email from Srinivas Lingutla to Kamal Acharya; February 11, 2001;

EXHIBIT E:

Email from Kamla Acharya to Todd Goldman, *et al.*; February 19, 2001;

EXHIBIT F:

Email from Srinivas Lingutla to Kamal Acharya; March 6, 2001;

EXHIBIT G:

Email from Kamal Acharya to Mohsin Hussain; March 7, 2001;

EXHIBIT H:

Email from Srinivas Lingutla to Kamal Acharya; March 11, 2001;

EXHIBIT I:

Email from Srinivas Lingutla to Kamal Acharya; March 21, 2001;

EXHIBIT J:

Email from Srinivas Lingutla to Kamal Acharya; March 28, 2001;

EXHIBIT K:

Email from Kamal Acharya to Mohsin Hussain; March 28, 2001;

EXHIBIT L:

Email from Srinivas Lingutla to Kamal Acharya; April 4, 2001;

EXHIBIT M:

Email from Kamal Acharya to Mohsin Hussain; April 8, 2001;

EXHIBIT N:

Email from Srinivas Lingutla to Kamal Acharya; April 10, 2001;

EXHIBIT O:

Email from Kamal Acharya to Mohsin Hussain; April 11, 2001;

EXHIBIT P:

Email from Kamal Acharya to Mohsin Hussain; April 11, 2001;

EXHIBIT Q:

Email from Srinivas Lingutla to Kamal Acharya; April 17, 2001;

EXHIBIT R:

Email from Kamal Acharya to Mohsin Hussain; April 19, 2001;

EXHIBIT S:

Email from Kamal Acharya to Mohsin Hussain; May 4, 2001; and

EXHIBIT T:

Email from Srinivas Lingutla to Kamal Acharya; May 9, 2001.

5. I have reviewed the above-referenced EXHIBIT B through EXHIBIT T and believe that they are of such character and weight as to establish the actual reduction of practice of the subject matter of the application prior to May 4, 2001.

6. Further, I believe that the above-referenced EXHIBIT B through EXHIBIT T are of such character and weight as to establish diligence in reducing the subject matter of the application to practice from prior to December 22, 2000, through the actual reduction to practice of the subject matter of this application prior to May 4, 2001.

7. EXHIBIT A through EXHIBIT T referred to herein are attached herewith. These exhibits are also already of record in the application. These exhibits were filed with the USPTO on December 22, 2005, in one or more prior declarations under 37 CFR 1.131.

8. I have reviewed the exhibits referred to herein and believe that they are accurate.

9. I further declare that all statements herein made of my own knowledge are true, and that all statements made on information or belief are believed to be true; and further, that the statements are made with the knowledge that the making of willful or false statements or the like is punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and may jeopardize the validity of any patent issuing from the present patent application.

Advanced Planning Meeting

Vincent Tong
10/16/00

Feel the "Brick & Mortar" Force...
Online retail sales will reach only a
modest 2% of the total retail market
within the next 4 years
(Red Herring/Forrester Research 07/00)

What's the problem we are trying to solve?

- ⌘ Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00)
- ⌘ Consequently, consumers need the ability to find the best deals for an individual product from online merchants as well as from physical store nearby all-in-one-place
- ⌘ Neither AOL nor our key competitors are addressing this need

83% of all online buyers look online for the most convenient offline physical store location"
- Jupiter

"73% of online browsers indicated that they researched products online and then purchased them at a physical store" - Jupiter

Goals

SHORT-TERM (Shop@Anywhere Bullet - 6 months)

- ⌘ Make shopping easier and more convenient by helping consumers to locate nearby physical stores of “click-&-mortar” Shop@ merchant partners
- ⌘ Highlight local offerings from “click-&-mortar” merchant partners (e.g. physical store presence, local store return/pick-up for online sales)
- ⌘ Earn consumers’ trust, as they release their zipcode/address to us
- ⌘ Generate additional pages views
- ⌘ Drive local ad impressions via Digital City

LONG-TERM

- ⌘ Provide a true multi-channel (both online and offline) merchant comparison environment with store-level product pricing and availability from “click-&-mortar”, “brick-&-mortar” only, and “pure-play e-tailer”

Project Metrics

- ⌘ Deploy store locator feature and highlight local store offering for 100% of “click-&-mortar” Shop@ merchant partners in 100% of Shop@ channels, after 3 months
- ⌘ 15% of store locator users will “store” their zipcode/address for repeat usage, after 3 months
- ⌘ Generate additional 17M pages views in year 1
- ⌘ Drive \$1.3M local ad impressions via Digital City in year 1

Value Proposition

Consumers

- ⌘ Convenience! -- This will make the info needed for my purchase decision readily available (local store listings of merchants)
- ⌘ Quick access to local store content (e.g. nearby restaurants, driving direction) to satisfy my need for entertainment & instant gratification
- ⌘ In the long term, "I have a feeling that [AOL Shopping] is limiting my choices" "Let me know that I could buy a book at BN.com but I could also buy it from Harry's Tiny Bookstore on the corner" (Murmurs)
- ⌘ Bottom Line = AOL provides us with the best comparison shopping for online merchants and local stores — HIGH

Value Proposition

“Click-&-Mortar” Shop@ Merchant Partners (30% in headcount)

- ⌘ Drive sales and foot traffic to local stores
- ⌘ Make the most impact in differentiating vs. pure-play e-tailers. Proximity (touch product, need ASAP, easy return, want ASAP) is the key edge of local merchants (Red Herring/Jupiter 07/00)
- ⌘ Effectively build trust for my online unit. Offline presence is the #1 factor in developing online merchant trust (Jupiter 8/99)
- ⌘ Multi-channel customers spend avg of 20-30% more than single channel customers (Jupiter 06/00)
- ⌘ Bottom Line = AOL helps us to leverage our physical assets to attract profitable customers to shop at our online and/or offline retail channels — HIGH

The Store Locator

- ☞ Proximity Search for local stores of “click-&-mortar” merchant partners in the Shop@ environment, including Merchant Comparison and other possible areas (e.g. A-Z Store Listing)

PLUS

- ☞ User may store multiple target locations (link to UMP?)
- ☞ Local store return/pick-up policy for online sales

Product Details:

- Description:** DVD Surround Sound, Dolby Digital, 5.1ch, 1000 Lines Resolution, Single Optical Receiver, 7.1-bit Audio DAC, Digital Coaxial, Digital Optical Audio Output
- Shipping Weight:** 19.0 pounds
- Dimensions:** 11.1in x 12in x 4.5in

Local Shopping:

Cost and Benefit

Revenue & Traffic Impact

Generate additional revenue in 3rd quarter
2nd via localized impressions

Generate additional \$2M page views
impr 11/3/24/11/10/11

Open up new revenue opportunities via
this localized platform

Did I mention Y! MSN
and Amazon don't have it?

Retention

Consumers: HIGH
Click-&-Mortar Merchants: HIGH
Pure-play e-tailers: -ve

2-month Development Cycle (Est.)

Engineering: 3.5 pm
Engineering- Digital City: 1.5 pm
UI Designer: 0.5 pm
QA: 1.0 pm
Product Manager: 1.0 pm
Ongoing CPE: 0.25 person

Key Dependencies / Risks

- ⌘ Depends on Digital City to provide the proximity search and the localized content – *Mitigation: Set the right expectation with DCI on performance requirements, server load , their flexibility and responsiveness in updating store level content upon Shop@ merchant partner's request*
- ⌘ Privacy concern on allowing user to store zipcode/address – *Mitigation: The initial check with Kent Walker (legal) was positive. Will confirm with Kent once features are finalized*
- ⌘ Negative reaction from “pure-play” e-tailer partners – *Mitigation: Ask Account Management team for feedback*
- ⌘ Different product assortment at Web channel vs. Physical Store  store channel for a merchant – *Mitigation: create*

Open Issues

- ⌘ Can/should we deliver the “stored” user zipcode / address to UMP? – Need to check with Personalization Divlet
- ⌘ In addition to “Merchant Comparison” area (stand-alone and under Product Page), where else can “Store Locator” appear? (e.g. A-Z Store Listing, Dept Pages) – Initial feedback is possible for A-Z Store Listing, but no room for Dept Pages. Need to finalize with Kathleen May.
- ⌘ Do we need permission from merchant partner to deploy “Store Locator”? – Need to check with Acct Mgmt

What's Next?

- ⌘ Core team assignment – this week
- ⌘ Further investigate open issues and risks
- ⌘ Project Kick-off Review & PRD – week of 10/30/00

EXECUTIVE SUMMARY

Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00). The Shop@ channels have done nothing to address this need so far. There is a huge opportunity for AOL to win the online/offline integration battle vs. the competition by having Digital City and Shop@ channels joined forces. Immediately, consumers will witness a better

comparison shopping experience with the ability to easily and conveniently find nearby retail locations of "click-&-mortar" merchant partners. In the long term, we will be able to open up new revenue opportunity by moving up the value chain (e.g. enabling large manufacturers/distributors to sponsor their "brick-&-mortar" dealers). It is an important yet simple first step to the right direction.

PURPOSE OF PRD

The purpose of this document is to define the target for the product team and extended operational team. It communicates the objectives and priorities of the product so that the product team makes the best decisions. It translates/tie business objectives so that team members can clearly understand how their work contributes.

REVISION HISTORY/CHANGE SUMMARY

Release 1.0: (10/23/00) Initial draft for review by core team.

ASSOCIATED DOCUMENTS

The following documents will also be written in conjunction with this requirement document.

Design/Testing:

- Technical specifications - Kamal A.
- Usability tests - Peter G.
- Test Plan - QA lead?

Launch:

- Marketing plan - Vincent T.

Post-mortem:

- Postmortem - Vincent T.

CONCEPT AND OBJECTIVES

Goal

IMMEDIATE GOAL

Unlock the power of Digital City, AOL's crowned jewel in the localized content play, into the Shop@ space. Create a better comparison shopping experience by enabling Shop@ users to easily and conveniently find nearby retail locations of Shop@ merchant partners.

LONG TERM VISION

Provide a true "one-stop-shop" for consumers to comparison shop. They may perform product search and merchant comparison on individual products from large and small "click-&-mortar", "brick-&-mortar" only, and "pure-play e-tailer" merchants.

Problem Definition

Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00). Consequently, consumers need the ability to find the best deals for an individual product from online merchants as well as from nearby physical store all-in-one-place. The Shop@ channels are not addressing this need at the moment.

"32% of all online buyers look [online] for the most convenient off-line physical store location"
- Jupiter

"73% of online browsers indicated that they researched products online and then purchased them at a physical store" - Jupiter

Business Objectives

Categories	Objectives
Consumer Satisfaction	Increase retention by making comparison shopping easier and more convenient
Merchant Partner Satisfaction	Increase retention of "Click-&-Mortar" merchant partners by highlighting their "offline" assets
Strategic	Earn consumers' trust, as they release their zipcode/address to us
	Open up future revenue opportunities via this localized platform (e.g. move up the supply chain to add value to manufacturers and to mom-&-pop stores)
Traffic	Generate incremental pages views
Revenue	Drive local ad impressions via Digital City

Prioritized Metrics

How do we know if we succeed?

Type	Priority	Metrics
Consumer & Merchant Partner Satisfaction	H	Deploy Yoda to 100% of "click-&-mortar" Shop@ merchant partners in 100% of Shop@ channels, within 3 months after the initial launch
Consumer Satisfaction	H	Achieve a click-thru rate of 5% for the "Store Locator" feature, within 3 months after the initial launch
Strategic	M	15% of users will "store" their zipcode/address for repeat usage, within 3 months after the initial launch
Page Views	H	Generate incremental page views of 21M in year 1 and 32M in year 2 (see Product Economics for assumptions)
Revenue	H	Drive additional local ad impressions via Digital City valued at \$1.6M in year 1 and \$2.4M in year 2 (see Product Economics for assumptions)

High level constraints

Categories	Constraints
Budget	None identified (It's been approved as part of the Shop@Anywhere Bullet)
Schedule	None identified
Staffing	UI resource constraint
Merchant	None identified

MARKET ANALYSIS & OPPORUNITY

Target Users

The primary audience is the current users of Shop@ channel: (Tier 1: Shop@AOL & Shop@AOL.com. Tier 2: Shop@Netscape & Shop@CompuServe. Tier 3: Shop@Gateway.net, Shop@Spinner & Shop@Winamp) The prioritization is based on their need and desire to shop offline.

- Priority 1: "Shirley"
- Priority 2: "Steve"
- Priority 3: "Chantilly"

(See appendix for the AOL Shopping Personas)

The secondary audience is the potential traffic coming from Digital City via the Shop@AOL.com integration points. Digital City is the most trafficked local content network in the U.S. with over 6M unique users/month, 8% reach (Media Metrix, June 2000 Home/Work).

- Priority 1: "Clicks-and-mortar shoppers": Using this term loosely to describe people who research/shop online as a means to buying offline. Research discussed at the Kelsey Local Commerce Conference indicated that 60%-70% of online shopping results in offline purchase, approaching \$750 million in annual purchases within the next few years.
- Priority 2: "Shopping enthusiasts": people who love to shop and see shopping and "the thrill of the hunt" as entertainment. Includes both in-town and visitor segments (about 50% of unique users for any particular Digital City come from outside the market)
- Priority 3: "Bargain-seekers": price-driven shoppers and sales fanatics interested in where to get the best deal, coupons/special offers, and sales.

(Source: Todd Unger, Digital City. Prioritization by Vincent Tong)

Competition

The winner will be determined by its ability to seamlessly deliver the most comprehensive store-by-store product content and store content. With Digital City as the competitive advantage on the store content front, the Shop@ channels are well positioned to win the online/offline integration war. To gain the first mover advantage in gaining access to merchant's store-by-store product content, Shop@ will continue to explore opportunity to partner with technology enablers (e.g. strategic investment), who are helping "click-&-mortar" merchants to synchronize their retail channels <See Long Term Vision>

PRODUCT ECONOMICS

AOL monetizes this product directly via incremental page views to Digital City.
Please see appendix for more detail.

Summary	Jan-Dec 2001	Jan-Dec 2002
Incremental page views	21M	32M
Revenue	\$1.6M	\$2.4M
Est. based on \$75 CPM		

KEY ASSUMPTIONS

- Only traffic driven by the Merchant Comparison area's "Store Locator" feature via Product Pages and Shopping Assistant are considered here.
- Traffic via other integration points (e.g. A-Z Store Directory, Department pages) are too trivial
- Future revenue opportunity as we built this localized platform is not considered in this model
- Higher retention rate of "Click-&-Mortar" merchants are not considered in this model
- The growth rate of online buyers from Jupiter is applicable to that of our users

PRODUCT AND SERVICE

Value Proposition

Consumers

- Convenience! -- Make comparison shopping easier, as the local store listings of merchants are readily available with a click of the button at convenient places within the Shop@ environment (e.g. Merchant Comparison area)
- Quick access to entertaining and helpful local store content via Digital City's Details Page (e.g. map, driving direction, user review, professional review, store sales, coupons)
- Bottom Line = AOL provides us with a better comparison shopping experience for online merchants and local stores — HIGH

"In the long term, we should be able to expand the universe of Shop@ partners to include "brick-&-mortar" only stores. "I have a feeling that [AOL Shopping] is limiting my choices" "Let me know that I could buy a book at BN.com but I could also buy it from Harry's Tiny Bookstore on the corner" (Murmurs)

"Click-&-Mortar" Shop@ Merchant Partners (30% in headcount)

- Drive sales and foot traffic to local stores
- Make the most impact in differentiating vs. pure-play e-tailers. Proximity (touch product, need ASAP, easy return, want ASAP) is the key edge of local merchants (Red Herring/Jupiter 07/00)
- Effectively build trust for my online unit. Offline presence is the #1 factor in developing online merchant trust (Jupiter 8/99)
- Multi-channel customers spend avg of 20-30% more than single channel customers (Jupiter 06/00)
- Bottom Line = AOL helps us to leverage our physical assets to attract profitable customers to shop at our online and/or offline retail channels — HIGH

Prioritized Requirements

The purpose here is to clearly communicate prioritized requirements to engineering, UI and QA so that they can make the correct trade-offs when making and implementing design decisions. The following requirements are prioritized as follows:

- P0 = Non negotiable. It isn't a functional product without this feature.
- P1 = Critical. Product can initially exist without this feature but not for long.
- P2 = Differentiating feature that may provide significant marketing value.
- P3 = Would be nice to have.

Please also see appendix for Terms and Definitions

Summary

- Proximity Search for local stores of click-&-mortar merchant partners in the Shop@ environment, including Merchant Comparison and other possible areas (e.g. A-Z Store Directory)
- User may store multiple target locations (link to UMP)
- Indicators of merchant's local store return/pick-up policy for online sales

The mock-up shows a product page for a DVD player. The main content area lists several merchants and their prices:

- amazon.com**: 4.5 stars, Out of Stock, \$9.45, Free Shipping
- mobishop**: 3 stars, In Stock, \$9.45
- Supernine**: 3 stars, Check Price, \$9.45
- Walmart.com**: 4.5 stars, In Stock, \$9.45
- State Street Direct ONLINE**: 4 stars, In Stock, \$9.45
- 800.com**: In Stock, \$9.45

The 'Local Shopping' section shows a map of San Francisco with a red dot indicating a local store. The 'Store Detail Page' sidebar lists the following information:

- Store Name
- Address
- Phone #
- Open Hours
- User Rating
- Reviews (user / pro)
- Map & Driving Direction
- Sales/Coupon
- What's nearby... etc.
- (Powered by Digital City)

The 'Authorized Reseller' section is circled in red and lists the following options:

- Retail Store
- Store Accepts In-Store Return of Online Purchases
- Store Accepts In-Store Pick-up of Online Purchases
- Store Accepts both In-Store Pick-up and Return of Online Purchases

Product Page: Merchant Comparison

(This mock-up is created solely to illustrate the idea. It's not the final design.)

Requirements	Priority
DRIVE AWARENESS AT SHOP@ CHANNELS	
"Store Locator" indicator next to each "click-&-mortar" merchant partner. It triggers the proximity search feature	P0
Clearly identify the different types of in-store return/pick-up policy for online sales of each "click-&-mortar" merchant partner	P1
A) Store Accepts In-Store Return of Online Purchases	
B) Store Accepts In-Store Pick-up of Online Purchases	
C) Store Accepts Both In-Store Return and Pick-up of Online Purchases	
D) Don't know or None	
Placement in Merchant Comparison area (includes but only limited to Product Page and Shopping Assistant) across Shop@channels	P0
Placement in Department Pages across Shop@channels	P1
Placement in A-Z Store Directory across Shop@channels	P1
Display the number of nearby stores for each "click-&-mortar" merchant within the default/predefined radius of the user's "stored" target location	P2
TARGET LOCATION(S)	
Solicit user for address, zipcode or city, state (within Shop@ channels). Pre-fill the form on repeat visits with the last selection (cookie?).	P0
Enable the same functionality for "Find It Locally" ¹ feature under Shopping Search	P1
Enable and encourage user to "store" multiple target locations (e.g. home, work, grandma's house). User may easily pick any one of their target locations to perform the proximity search. Requires authentication of the corresponding membership (e.g. AOL, CompuServe, Netscape). Information will be stored as an extended UMP profile for the user so that the data will be standardized and tightly controlled and other applications can share this data (should collaborate with MapQuest and UMP owner Rizwan Ali on this).	P2
Pre-fill target location form from user's core UMP under Shop@AOL and Shop@CompuServe (if any). <Subject to Privacy Issue> ²	P3
User may define the search radius (could be stored along with the target location as well)	P3
PROXIMITY SEARCH (BY DIGITAL CITY)	
Search: With the target location, merchant name and search radius (default or user-defined) as parameters, search for the merchant partner's physical stores in the Digital City directory.	P0
Presentation of Search Result: Minimally, the search result must display store name, proximity to target location and phone number. If there is no result, user will be advised to return to select another Shop@ merchant partner. If there are more than one search result, the stores will be ranked by proximity starting with the closest one.	P0
To ensure accuracy of search result (e.g. Blockbuster Fireworks Inc. should not be returned as a search result for "Blockbuster"), the "click-&-mortar" merchant partners should be mapped to their retail outlets at the Digital City directory (e.g. add a Shop@ merchant ID to all Blockbuster stores and use this ID as search	P0

¹ "Find It Locally" resides on the Shopping Search 2.0 Result Page. Currently, it collects a zipcode from the user and passes the search's product category and the zipcode to Digital City. The result would be a list of offline merchants under the same product category and the zipcode.

² Currently, UMP (Unified Member Profile) is at its early infancy. According to UMP's Product Manager Rizwan Ali, it does not collect info from subscriber's billing profile (due to privacy issue) and depends largely on My AOL.com. Moreover, information stored at core UMP (e.g. address, birthday) also need to be assigned whether it could be shared for application outside My AOL.com or not.

parameter instead of merchant name)	
Each search result contains a direct link to the store's Details Page	P0
STORE DETAILS PAGE (BY DIGITAL CITY)	
Content Availability: With an estimated launch in mid-Dec 2000, the Details Page is the heart of Digital City's enhanced shopping directory. While the exact amount of content for each location may vary depending on Digital City's content acquisition efforts. Here is the prioritized list of content item for all "click-&-mortar" merchant partners.	
- Venue description (store name, address, phone #, & editorial)	P2
- Photo	P2
- DCI Utilities ("Map") & Driving Directions (takes the target location)	P0
- Enhanced Data – hours, accepted payment, price info, return policy, parking, cross street, upcoming events	P2
- Local Expert Reviews	P2
- Fulfillment Tools (sales, coupon) via ShoppingList.com co-brand	P1
- Shop@ Integration (static link to Shop@AOL.com)	P0
- NetBusiness Biz Card tie-in	P3
Update Content: With a one week turn-around time, a Digital City Producer should be able to update the "factual" content items of individual listing upon the request of Shop@ merchant partners via their Account Managers. These items include "Enhanced Data" & "Venue description" (except for the editorial). Moreover, the producer should also be able to handle adding a new store and deleting a "closed" one in the same time frame as well. The change should propagate across the Digital City directory.	P0
Block "Unfriendly" Advertising: With a one week turn-around time, a Digital City Producer should be able to filter out advertising deemed "unfriendly" by the Shop@merchant partners. The change should be limited to only this co-branded Details Page.	P2
THE DIGITAL CITY & SHOP@ CO-BRAND EXPERIENCE	
Until the user returns to the Shop@ channel, his/her entire experience after igniting the "Store Locator" feature will be co-branded by Digital City and the corresponding Shop@ channel	P0
The co-branded site will be stripped of all non-shopping related content to minimize distraction of user's online shopping activity. However, user can always access the entire product offerings of Digital City by clicking on the "Digital City" logo.	P1
CUSTOMER CARE	
Self Help FAQ on this feature should be readily available within the co-branded environment	P0
Consumer feedback form should be readily available within the co-branded environment. The "categorized" feedback form is a vehicle for Shop@ Product Group to collect user comments on this feature and is NOT meant to be answered by customer service.	P1
REPORTING	
# of impressions, click-thrus and empty result of the "Store Locator" feature for each "click-&-mortar" Shop@ merchant partners, per Shop@ channel-location (e.g. Product Page's Merchant Comparison at Shop@Netscape.com)	P0
# of Page Views at Digital City & Shop@ co-branded page via the "Store Locator" feature, per Shop@ channel	P0
# of Unique Users "storing" their target location for repeat usage	P1

Long Term Vision

- Seamlessly integrate the latest product information (e.g. availability, pricing) of individual physical retail locations of Shop@ merchant partners into Shop@ Product Search and Merchant Comparison all-in-one-place.
- Include product information on store-by-store level from "Click-& Mortar" merchant partners into the Datamart
- Include product information on individual "Brick-& Mortar" Mom-& Pop stores (sponsored by manufacturers?) into the Datamart
- Provide Product Page for "Specialty" items, currently un-available due to the lack of product content. With local store information, it might be compelling enough to have a Product Page for Guess Jeans.

Be patient....

Unfortunately, merchants are NOT ready yet. Most "Click-& Mortar" merchants have NOT synchronized their Web and physical store retail channels. That means they lack the ability to pinpoint the availability or even the pricing of an individual product for each of their physical stores. Echoing the "Competition" section.... To gain the first mover advantage in gaining access to merchant's store-by-store product content, Shop@ will continue to explore opportunity to partner with technology enablers (e.g. strategic investment), who are helping "click-& mortar" merchants to synchronize their retail channels.

UI Design Goals

AOL Shopping Persona	User Experience Goals to "Find nearby stores of Shop@ merchant partners"
Shirley	<ul style="list-style-type: none"> - EASY: The "Store Locator" features are conveniently located next to all "click-&-mortar" merchant partners throughout the Shop@ channel. It's so easy to find them. - SENSE OF ACCOMPLISHMENT: a.k.a. dummy-proof. The "Store Locator" feature is so easy to use. There is no way for me to make a mistake, unless I type in the wrong target location.
Steve	<ul style="list-style-type: none"> - FAST: Once I decided that I like this product, I can quickly compare prices from online store and call up nearby local stores for pricing and availability. 2 or 3 clicks.... I am done.
Chantilly	<ul style="list-style-type: none"> - FUN: There is so much interesting content on the Details Page for this store (e.g. Local Expert reviews on this store). I can't wait to tell my sister about it.

<See Appendix: AOL Shopping Persona for details on the personas>

Other Goals:

- It is highly likely that there are different product assortment at Web channel vs. Physical store channel for a merchant. If the user is coming from the Merchant Comparison page, we need to set the right expectation with the user that the local stores might or might not carry this product and the pricing might not be the same.
- Avoid distracting consumers with other DCI content. Filter out the non-shopping related content.
- User may easily return to what they were doing at the Shop@ channel (e.g. the "Store Locator" feature could open a new window for the Digital City co-brand)
- The placement of "Store Locator" will NOT cause the Product Page to violate the merchant agreement of display at least 2 merchant at merchant comparison area above the fold.

Release Criteria

HARDWARE

The following requirements are expected to run on the following hardware platforms:
<Please see appendix>

WEB

- ☐ No P0 or P1 defects
- ☐ No misspellings or alignment errors can appear in the UI
- ☐ Proximity search results will be generated correctly at least 99% of the time
- ☐ Having the "Store Locator" on Shop@ channels does not noticeably effect the download speed
- ☐ Digital City can process proximity search request and push search results within 8 seconds at peak time, 3 seconds average
- ☐ Digital City can support an additional 5 service requests per second at peak for the proximity search
- ☐ It should take a Digital City producer a one-week turnaround time at the maximum to update store content on Details Page, adding a new store or deleting a closed store
- ☐ All help documentation (FAQ) describing "Store Locator" usage is included
- ☐ The following usability criteria will be demonstrated through user tests
 - ☐ 90% of tested users do not find "Store Locator" distracting
 - ☐ 90% of tested users understand what "Store Locator" will do for them before clicking on it
 - ☐ 90% of tested users can find the local stores of a "click-&-mortar" merchant in front of their screen without additional instruction, especially with the target location tool
 - ☐ 80% of tested users indicate that the search results and Details are useful while shopping, and that they would use it again

OPERATIONS

Operational issues and Resolutions

SUPPORT CONSUMERS

Support	Tier 1: Shop@AOL & Shop@AOL.com	Tier 2: Shop@Netscape & Shop@CompuServe	Tier 3: Shop@Gateway.net, Shop@Spinner & Shop@Winamp

Phone	None	None	None
On-line	Self-Help FAQ	Self-Help FAQ	Self-Help FAQ

SUPPORT MERCHANT PARTNERS

<Store Info Update>

- "Click-&-Mortar" merchant partners are expected to request updates on their local store content in the Digital City database (e.g. new phone #, new store opening, store close-down, store relocation) via their *Account Managers*
- The assigned *producer* at Digital City to handle this request is TBD.
- We must be careful in setting the right expectation with merchant partners on the editorial integrity of Digital City. Digital will ONLY change the factual content items on the Details Page.

RISK AND ISSUES

Issues

Areas	Status	Issues
Legal	Open	Privacy concern on allowing user to store zipcode/address - Mitigation: The initial check with Kent Walker (legal) was positive. Will confirm with Jim Bramson and Kent Walker once features are finalized
Merchant	Open	Do we need permission from merchant partner to deploy "Store Locator"? - Need to check with Acct Mgmt
Placement	Open	In addition to "Merchant Comparison" area (stand-alone and under Product Page), where else can "Store Locator" appear? (e.g. A-Z Store Directory, Dept Pages) - Initial feedback is possible for A-Z Store Listing, but no room for Dept Pages. Need to finalize with Kathleen May.
UMP	Closed	Can/should we deliver the "stored" user zipcode / address to UMP? - Need to check with Personalization Divlet
Space Limitation	Open	On Product Pages, we are promising that 2 merchants will be display at merchant comparison area "above the fold". Need to verify with Account Services.

Risks

Areas	Risks	Contingency (Plan B)
Merchant Partner Satisfaction	Potential negative reaction from "pure-play" e-tailer partners	Ask Account Management team for feedback

Dependencies

Areas	Dependencies	Contingency (Plan B)
Internal Tech & Content Partner	Depends on Digital City to provide the proximity search and the localized content	Set the right expectation with DCI on performance requirements, server load, their flexibility and responsiveness in updating store level content upon Shop@ merchant partner's request

RESOURCE AND SCHEDULE***Schedule (Preliminary)***

Staffing (Preliminary)

Appendix

Usage Estimate

KEY ASSUMPTIONS					
- Revenue from Store Locator at A-Z Store List is too trivial					
- Future revenue opportunity as we built this localized platform is not considered in this model					
- Higher retention rate of Clicks-&Mortar merchants are not considered in this model					
- Est. traffic between Aug 01 - July 02 is used for Yr 1					
- The growth rate of online buyers from Jupiter is applicable to that of AOL users					
TRAFFIC ESTIMATES					
US online buyers (Jupiter 1/00)			Page Views for Product Pages		
Yr	Online Buyers	Growth Rate	Annual	Period	
2,000	39,000,000	n/a	154,856,365	Aug 00 - July 01 (AOL e-commerce Estimates)	
2,001	52,000,000	33%	189,836,713	Yr 1 (Using AOL e-commerce est for Jan-Jul '01 and using Jupiter's Growth Rate for Aug-Dec '00)	
2,002	67,000,000	29%	233,001,150	Yr 2 (Using Jupiter's Growth Rate)	
			YEAR 1	YEAR 2	SOURCE/EXPLANATION/ASSUMPTION
			Jan 01-Dec 01	Jan 02-Dec 02	
Merchant Comparison Only Page PVs			180,836,713	233,001,150	Shopping Assistant is driving traffic to Merchant Comparison Only Page in the same rate as Search to the Product Page
Page Views (Product Page & M.C. Only Page)			361,673,426	466,002,299	
Avg # Merchants at M.C.			4.0	4.5	Shop@ M.C. team
% Click-&Mortar Merchant			30%	30%	Shop@ A-Z Store List 8/8/00
% Store Nearby User			20%	20%	Wild guess. Important
% Local Store Available at M.C.			24%	27%	(% Brick-&Mortar Merchant x % Store Nearby User) x Avg # merchants at M.C.
% User decided to pursue a merchant			30%	30%	Shop@ M.C. team
% User prefer to shop offline			75%	75%	Jupiter
% Subtotal			5.4%	6.1%	
PVs on Proximity Search Result Page (DCI)			19,530,365	28,309,640	
% Click-thru to Details Page			10%	15%	Wild guess. Need to ask DCI
PVs on Details Page (DCI)			1,953,037	4,246,446	
Total PVs			21,483,402	32,556,086	
CPM			\$75	\$75	Digital City - Shopping Category (Todd Unger)
REVENUE			\$1,611,255	\$2,441,706	
SERVER LOAD ESTIMATE					
Service Requests		For the Year	19,530,365	28,309,640	
Peak Month (Dec) = 18%			3,515,466	5,095,735	
Daily Avg During Peak Month			113,402	164,379	
Peak Hour (10% of day)			11,340	16,438	
Service Requests Per Second During Peak Hour			3.15	4.57	

Terms and Definitions

The following terms are used (and italicized) throughout the PRD, especially in the requirements section.

"Click-&-Mortar" Shop@ Merchant Partners: Shop@ merchant partners with physical retail outlets and a web store-front (e.g. BN.com)

"Brick-&-Mortar" Shop@ Merchant Partners: Merchants with physical retail outlets and no web store-front (e.g. Mom-&-Pop store)

"Pure-Play E-tailer" Shop@ Merchant Partners: Shop@ merchant partners with a web store-front but no physical retail outlets (e.g. eToys)

System Users

There are three different classes of users for the Shopping Assistant: shoppers, administrators and producers, and executives. Each class is described below. Features for shoppers will be developed first, followed by features for administrators and producers, and finally executives.

Shoppers: These are the end users of the system. They interact with the system from within the AOL and CompuServe clients. Their goal is to shop online.

Administrators and Producers: These are the users charged with the ongoing operation and maintenance of the system. These users are responsible for trouble-shooting, for adding/deleting and editing merchants and sites where Shopping Assistant services are recommended, and for performing routine maintenance. Their goal is the successful operation, maintenance and expansion of the Shopping Assistant.

Executives: Executives are interested in tracking the use and acceptability of the Shopping Assistant. Their goal is to determine how the Shopping Assistant is functioning and whether it is attaining its success criteria.

AOL Shopping Personas

<Source: Peter Gremett>

Mock-up of Digital City Details Page (not final)

The details page is the heart of Digital City's enhanced shopping directory:

[illegible]

Hardware Requirements

Unless otherwise noted, the features described in PRD are meant to run on the following hardware configuration:

Server-Side

- Operating System: Solaris 2.6 and above
- Processor: Sun E450 4 CPU
- Memory: 2 GB RAM
- Disk Space: 4 GB hard drive space

Client-Side

- Operating System: Windows: 32-bit Win95/98/Me; Win NT/2000; Whistler
- Processor: Pentium Class PC
- Memory: 16 MB RAM
- Disk Space: 48 MB hard drive space
- Screen Resolution: Minimum resolution: 640 x 480; 256 colors
- Internet Connection: Modem, 28.8

<html>

<h3>

Status for week ending 2/9/2001</h3>

1. Continued work on Local Stores design. Met with Rick Henderson and Glenn Mi to talk about modifications to the Merchant Compare service to include local store information. Finalized most of the outstanding design issues.

<p>2. Continued work on installation and configuration of VL5 plugin. Successfully configured the VL5 plugin on landscape.web.aol.com to read Magic Carpet Authentication headers (for web users).

<p>The Magic Carpet VL5 catalog is not released to production and the TurboWeb group does not yet have a test environment set up to

test new catalog which includes the latitude/longitude information.

<p>I still haven't received the mapping file for converting location information to a zip code. The person responsible in the AOLNet Ops is no longer working in the group due to reorg and I have sent mail to the manager, Steve Long, asking for the file.

<p>3. Completed focal review.

<h4>

Next Week:</h4>

1. Continue configuration of VL5 plugin.

2. Review Local Stores design.

3. Support Shopping List.</html>

EXHIBIT E

Continued experimentation with the VL5 plugin. Still waiting for the mapping file for converting location information from VL5 header to zipcode.

Shopping Widget:

Finished design doc. Design review scheduled for the next week.

Implemented class to generate XML from parsed data.

Started working on image manipulation.

Product Page Anywhere:

Finished design doc. Design review scheduled for the next week.

Completed Focal Review.

Worked on the Integrated Schedules.

Next week:

Hold design reviews.

Reexamine schedules.

Get schedule commitments from DCI and P13n divlet.

Issues:

Getting schedule commitment from DCI is still the biggest issue.

Project Management status:

<p>Accomplishments this week:

<p>- Continued work on the event codes. Merchant Comparison, Shopping Assistant,

and Wallet have event codes that still need work. Wallet has some that need to be set up with

"impact", a new tool from the NOC that allows an event to be monitored over a specified amount of time so that it only gets reported if it occurs x amount of times during x duration of

time.

- I talked to AOL San Diego (Personal Logic) to make them aware of the changes to product pages.

- Followed up with Jim Bramson on copyright requirements on the printer friendly pages.

- Met with EMC rep from Operations to review our new projects.

- Started conversations with Ops to make them aware of our new projects and get assignments. Still need to do followup.

<p>Issues:

- QCPP 2.0 has no schedule or official plans yet. However if they want to make it into Shopping Assistant for AOL 6.5, they need to start working on it now. Ellen, the new PM for

QCPP 2.0, is aware and addressing the issue.

<p>For next week:

<p>- Continue working on event codes.

- Followup with Ops on new projects. Will invite them to the Design reviews this week.

- Finish non-engineering schedules for the Shop@anywhere projects.

- Hopefully get to committed schedule by end of week.

- Kimberly-Blessing will be visiting. We should discuss the Local Stores and ShopHelp.

- Eirene Espinosa is also visiting. She is the Project manager for AOL client 6.0 refresh. Meeting with her regarding Shopping Assistant.

<h3>

Status for week ending 3/2/2001</h3>

1. On vacation from 3/1 to 3/2

<p>2. Continued work on VL5 configuration/testing. The current problem with testing for Magic Carpet authentication is that the user auth information (screen name, service type, etc) is available only for the first request to the web server. I have sent my configuration files to the vlsupport team, but no resolution, yet.

<p>3. Started making modifications to the Merchant Comparison module to include local store information.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

<html>

Escalations

None.

Accomplishments

Product Page Print & Email

Installed Search code on development server. Still some issues with
 the cache database. Continued setting up the development environment.

Worked on the Mail Handler backend code.

Met with QA team to help develop test plan.

Engineering and QA participated in the finalized UI review.

Local Store

Discussed merchant feed handling strategy with Steve and Yogi. Came up with a workable plan. Need to write down the plan and do a sanity check with others in the divlet and with DCI.

Discussed including Local Store locator on A-Z pages. The Dulles team doesn't want to spend a lot of effort into this. They agreed to include a simple store search widget.

Got familiar with the Merchant Compare code and started coding the local store UI.

Engineering and QA participated in the finalized UI review.

Shopping Widget

QA wrote first draft of the test plan.

Continued working with the P13n folks on the widget implementation details.

Reviewed Shop@Anywhere project requirements with Ops.

Issues

DCI relationship still requires very close management. No need to escalate yet.

Ops raised some issues with our plan to scrape the "store specials" from the department pages. David Habib promised to work with us on this issue and on hardware requirement.

Next week

Product Page Print & Email

Finish setting up development environment.

Try to finish Mail Handler back end.

Local Store

Get agreement from everyone involved on the merchant feed handling. Come up with a plan for implementing the necessary changes to the Tools and feed processing.

Make progress on Local Store UI development.

Widget

Resolve Ops issues.

Meet with P13n QA folks to determine the Widget QA environment and responsibilities.

Resolve open issues with the P13n engineering team.

</html>

<h3>

Status for week ending 3/9/2001</h3>

1. Continued work on VL5 configuration/testing. Successfully completed testing of Magic Carpet Authentication. Completed coding for authentication of AOL and CS users.

<p>Submitted request for VL5 headers (in place of X-AOL headers) for the Shopping List QA machine.

<p>2. Continued modifications to the Merchant Comparison module to include local store information.

<p>3. Completed checkin of the code modifications for the enhancements to Shopping List to support CTA Banner service, after successful testing by the CTA Banner team.

<p>4. Met with Manomohan Pillai and Michael Forncrook to update them on recent modifications to Shopping List.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

<html>

<h3>

Status for week ending 3/27/2001</h3>

1. Testing still underway for Shopping List Release 1.1 on QA server. It turned out that the VL5 headers were not initially turned for the cs.com alias of the server. Currently, VL5 authentication works for both web users and in-service users (AOL and CS).

<p>We just noticed another problem, initially reported by the CTA team, where if two users sign in from a web browser in succession, the second user is authenticated as the first user!

<p>I have informed the vlsupport team of the problem. The installation of the new release of Shopping List on production servers is likely to be delayed, pending investigation of the problem.

<p>2. The Merchant Comparison module is modified to work with a text database of the local store merchants. Both the grid version and standard-html version of the MC are working now. We are awaiting the activation of the proximity search interface at DCI so that we can start sending queries to DCI to look up local stores.

<p>3. Reviewed and provided feedback for the QA Test plan for Local Stores.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

Accomplishments

Product Page Anywhere

Continued working on the Product Page Email JSPs and integration with the

Search servlet.

Integrated with Magic Carpet.

Local Store

Both the grid version and the stand alone version of the Mercant Compare are modified to show local stores. We are awaiting the activation of the proximity search interface at DCI so that we can start sending queries to DCI to look up local stores.

Reviewed QA test plan.

Shopping Widget

Kept working on hosting issues with Ops. We are close to a resolution. Laura is driving this.

Reviewed HTML for the widget.

Issues

None

Next week

Product Page Anywhere

Try to finish Product Page Email JSPs.

Work on first drop to QA.

Local Stores

Wire Local Store UI to DCI search URL, assuming their interface is live.

Integration testing.

Shopping Widget

Resolve Ops issues.

Work with P13n folks on the QA process

<h3>

Status for week ending 4/2/2001</h3>

1. Implemented a workaround for the recently found bug in VL5 plugin. If two users sign in from a web browser in succession, this bug results in the second user being authenticated as the first user. The problem is caused by a authentication cookie set by the VL5 plugin when the first user logs in; this cookie is not regenerated when a second user logs in, but is instead reused, resulting in the second user being authenticated as the first.

<p>The workaround clears the VL5 cookie during logout from Shopping List; a new cookie is then generated by VL5 when a new user logs in. After this workaround is tested on QA server, installation of Shopping List Release 1.1 on production servers will be scheduled.

<p>2. I started installing and running the Search service on a new UltraSparc machine; I could not run Search on my Sparc20 system, landscape, because Search software requires UltraSparc systems.

<p>The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise Ids for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

Shop@Anywhere weekly engineering status

4/4/01 - 4/10/01

<p>Local Store

<p>Escalations

None

Accomplishments

Have a working prototype of the local store grid in Product Page:

http://

landscape.web.aol.com:2300/Store_Locator_Demo.html.

It includes all the logic necessary in Search and Merchant Compare.

It uses a stub DCI page for now, pending the availability of the DCI URL to be live. It also doesn't include any of the datamart changes. The list of merchants with local stores are stored in a text file for now.

Continued working with DCI on finalizing the merchant feed spec.

Issues

Need to get better closure on technical issues. The feed spec needs to be finalized soon.

Still don't have the URL spec that has all the parameters we need to pass to DCI.

Next week

Get agreement on the merchant feed spec.

Work with UI team to finish the local store grid.

Work on first drop to QA. Need to decide if we want to wait a few days for the DCI URL to go live.

Shopping Widget

<p>Escalations

None

<p>
Accomplishments

Made changes to the XML feed based on input.

P13n team working on the Widget PSP.

Didn't have a chance to put in writing the hosting solution that Ops signed

off on. This will need a change in the image urls generated by the Extractor, since in the proposed solution the images would be server from the MyAOL servers.

Issues

There was some suggestion from Kathleen May that the image specials may be replaced with text spacial in a future redesign of the department page. This will be a problem since, as designed, we are currently scraping image specials only. Kimberly Blessing doesn't think that this change would happen anytime soon. But, we need to have a plan to deal with this possibility, before we lose the services of the widget bullet engineers.

There are some technical issues on the PSP that need to be resolved soon.

Next week

Resolve the PSP technical issues.

Have a plan for handling the text only specials.

Try to finish Netcool error handling.

Product Page Anywhere

<p>Escalations

None

Accomplishments

Spent most of the time on integration testing with Search and VL5.

Issues

QA would like to have a drop soon.

Next week

The first QA drop.

Review QA test plan.

<h3>
</h3>

<h3>

Status for week ending 4/17/2001</h3>

1. There were a couple of problems with the configuration of VL5 on the Shopping List production servers, that resulted in the in-service users not being authenticated. After fixing the configuration, the release 1.1 of Shopping List is working fine with VL5 authentication for both VL5 and web users.

<p>2. The code for Local Stores is ready to be checked in. We are currently debating the the correct location for the checkin; on a branch of the CVS source or on the tip, after backing out the latest changes to database schema. The datamart and cache modules built from the tip of the CVS source require updates to the Datamart and DB schema on the QA and production servers.

<p>Completed printer-friendly version of the MC and LS tables.

<p>The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise Ids for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Deliver a release of Search and Datamart modules to QA for testing of Local Stores.

2. Support CTA Banner service and Shopping List.</html>

Shopping Widget

<p>Escalations

None

Accomplishments

The Extractor code committed to CVS.

Did first drop to QA.

Fixed error handling and added Netcool logging.

Reviewed the impact of text only specials and we are able to handle them fine.

Met with the P13n core team to discuss multi brand support. Also, discussed support for the widget after the widget bullet team moves on to their next project in mid May.

Issues

The widget bullet folks are strapped for resource. They can only commit 1 day a week for the shopping widget. They expect to be able to devote more time after the end of April.

The P13n core team needs to take on the shopping widget. (We have already brought it up with them)

Next week

Fix any problems found by QA.

Resolve multi brand support.

Product Page Anywhere

<p>Escalations

None

Accomplishments

First drop to QA done, with both email and print features available.

Issues

none

Next week

Fix bugs found in QA.

Re: Method and System for Integrated Online and Brick and Mortar Provider Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by June 3, 2011

Dear Mr. Crampton:

My firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which originally filed by AOL with you listed as an inventor. This application is rejected and we believe that we can overcome the rejection by establishing conception and reduction to practice of this invention by Oct. 23, 2000. As you may recall, you assisted in a similar process, in late 2005, to establish that this invention was conceived and reduced to practice prior by April 27, 2001.

I have attached a copy of a new declaration, copies of Exhibits A-T (which are referred to by the new declaration – and also by the 2005 declaration), and a copy of the publication of this patent application.

Please review these materials including all information on the new Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the new declaration in blue ink and return the signed declaration to us. We are enclosing, with the UPS copy of this letter, a pre-addressed envelope for returning the original document to my office. The declaration should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declaration has been signed, please return it to my office in the enclosed pre-addressed envelope. Please also **fax** the signed Declaration to (206) 292-0460, or scan and **email** the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by **June 3, 2011**.

If you have any questions, please do not hesitate to contact me directly. Thank you for your

8/23/2011

valuable assistance.

Sincerely,

Davin Chin

Re: Method and System for Integrated Online and Brick and Mortar Provider
Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by July 29, 2011

Dear Mr. Crampton:

As you know, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which was originally filed by AOL with you listed as an inventor.

During our handling of the declaration discussed in our prior letter of July 12, 2011, we learned from Ms. Ellen Butler Patterson that she should not have been listed as an inventor on this patent application. Accordingly, it would be appropriate for us to file a new Declaration establishing the correct inventorship of this application.

I have thus attached a copy of a new declaration, a copy of the publication of this patent application; and copies of the amendments of (a) October 18, 2002; (b) September 23, 2003; (c) January 20, 2004; (d) October 4, 2004; (e) April 20, 2006; (f) August 9, 2006; (g) July 17, 2008;

July 20, 2011

Page 2

(h) December 19, 2008; (i) July 17, 2009; and (j) April 27, 2010). I have also included a return envelope which you may use to return the signed declaration to my office.

Please review these materials including all information on the new Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the new declaration in blue ink and return the signed declaration to us. The declaration should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declaration has been signed, please return it to my office in the enclosed pre-addressed envelope. Please also fax the signed Declaration to (206) 292-0460, or scan and email the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by July 29, 2011.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

Post Office Address: 20 Meadow Ridge Drive, Pittsfield, MA 01201

Title 37, Code of Federal Regulations, Section 1.56
Duty to Disclose Information Material to Patentability

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct.

The Office encourages applicants to carefully examine:

(1) Prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) The closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a *prima facie* case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability.

A *prima facie* case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) Each inventor named in the application;

(2) Each attorney or agent who prepares or prosecutes the application; and

(3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

UPS CampusShip: View/Print Label

1. **Print the label(s):** Select the Print button on the print dialog box that appears. Note: If your browser does not support this function select Print from the File menu to print the label.

Subject: Declaration for U.S. Patent App. No. 09/975,831; SWW Ref: 122118-175973
Attachments: 122118-175973 Crampton Declaration.pdf; 00 122118-175973 Inventorship Declaration.pdf

Mr. Crampton,

Thank you for the UPS package you returned to us recently.

Unfortunately, the declaration you signed was an older version of the updated declaration we sent to you on 7/12. We also sent you an inventorship declaration last week (7/21) which we need to remove Ms. Ellen Butler Patterson as an inventor from this application. I've attached the two declarations. The supporting documents are in the UPS packages of 7/12 and 7/21. However, please let me know if you need any of the supporting documents-I'd be glad to send them via email and/or UPS.

Could you please review the updated declaration and the inventorship declaration, sign and date them, and return them to me?

If you have any questions or need any other information, please call me at 206-407-1512. I should be able to fully explain the situation in only a few minutes.

Best Regards,

Davin

Re: Method and System for Integrated Online and Brick and Mortar Provider
Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by Aug. 10, 2011

Dear Mr. Crampton:

As you know, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which was originally filed by AOL with you listed as an inventor.

We previously sent you a package on July 12, 2011 which included a declaration under 37 CFR 1.131 to establish dates of conception, reduction to practice, and diligence in reducing the invention to practice ("the 131 Declaration"). The July 12, 2011 package also included copies of Exhibits A-T (which are referred to by the 131 Declaration), a copy of the publication of this patent application, and a return envelope.

On July 20, 2011 we also sent you an Inventorship Declaration along with a copy of the publication of this patent application and copies of the amendments of (a) October 18, 2002; (b)

Aug. 1, 2011

Page 2

September 23, 2003; (c) January 20, 2004; (d) October 4, 2004; (e) April 20, 2006; (f) August 9, 2006; (g) July 17, 2008; (h) December 19, 2008; (i) July 17, 2009; and (j) April 27, 2010; as well as a return envelope.

Unfortunately, we have not yet received your response to either of these packages. We are thus sending additional copies of the 131 Declaration, Inventorship Declaration, and above-listed supporting documents along with a return envelope which you can use to return the signed 131 Declaration and Inventorship Declaration to my Office. However, if this letter and your response to the July 12 and July 20 packages have crossed paths in transit, please disregard the enclosed materials. We would, however, appreciate a call or email to let us know that the Declarations are in transit.

Please review these materials including all information on the 131 Declaration and Inventorship Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the declarations. The declarations should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declarations have been signed, please return them to my office in the enclosed pre-addressed envelope. Please also fax the signed Declaration to (206) 292-0460, or scan and email the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by Aug. 10, 2011. Please note that failure to respond may be considered a refusal to sign these declarations.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

Subject: FW: Declaration for U.S. Patent App. No. 09/975,831; SWW Ref: 122118-175973
Importance: High
Attachments: 122118-175973 Crampton Declaration.pdf; 00 122118-175973 Inventorship Declaration.pdf

Dear Mr. Crampton:

I am following up on Mr. Chin's email below, since we have not yet received your signed updated declaration and the inventorship declaration (copies again attached herewith) that he sent to you below on July 25. We also sent the updated declaration and the inventorship declaration to you via UPS packages on August 1, 2011.

Could you please review the updated declaration and the inventorship declaration, sign and date them, and return them to me by **August 23, 2011**? We have an urgent deadline to file these documents with the U.S. Patent Office, and your assistance in providing the signed declarations to me would be very much appreciated.

If you are able to do so and if convenient, you can fax the signed declarations to me at the fax number below, or scan and email them to me.

I realize that your time is important, and we thank you for your attention. Please do not hesitate to call me at the number below if you have any questions.

Best regards,

DENNIS M. de GUZMAN | Attorney

Subject: Declaration for U.S. Patent App. No. 09/975,831; SWW Ref: 122118-175973

Mr. Crampton,

Thank you for the UPS package you returned to us recently.

8/23/2011

Unfortunately, the declaration you signed was an older version of the updated declaration we sent to you on 7/12. We also sent you an inventorship declaration last week (7/21) which we need to remove Ms. Ellen Butler Patterson as an inventor from this application. I've attached the two declarations. The supporting documents are in the UPS packages of 7/12 and 7/21. However, please let me know if you need any of the supporting documents-I'd be glad to send them via email and/or UPS.

Could you please review the updated declaration and the inventorship declaration, sign and date them, and return them to me?

If you have any questions or need any other information, please call me at 206-407-1512. I should be able to fully explain the situation in only a few minutes.

Best Regards,

Davin

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:
Acharya et al.

Application No.: 09/975,831

Filed: October 11, 2001

Art Unit: 3625

For: **METHOD AND SYSTEM FOR
INTEGRATED ONLINE AND BRICK AND
MORTAR PROVIDER SHOPPING**

Examiner: Brandy A. Zukanovich

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION OF MATTHEW C. CRAMPTON UNDER 37 CFR 1.131

I, Matthew C. Crampton, declare and state that:

1. I am a co-inventor of the subject matter of the above-referenced U.S. Patent Application (the "application"). I make this declaration to establish:

- (A) conception of the subject matter of the application, in the United States, prior to October 16, 2000,
- (B) actual reduction of practice of the subject matter of the application, in the United States, prior to May 4, 2001, and
- (C) diligence in actually reducing the subject matter of the application to practice, in the United States, from prior to December 22, 2000, through the actual reduction to practice of the subject matter of this application prior to May 4, 2001.

2. I contributed to the conception of the subject matter of the application prior to October 16, 2000. As evidence of this conception, I refer to the following exhibit:

EXHIBIT A:

Powerpoint presentation, Shop@Anywhere Episode 2: Online/Offline
Integration *Code Name: Yoda*, October 16, 2000.

3. I have reviewed the above-referenced EXHIBIT A and believe that it is of such character and weight as to establish conception of the subject matter of the application prior to October 16, 2000.

4. I contributed to the actual reduction of practice of the subject matter of the application prior to May 4, 2001. As evidence of this actual reduction to practice, I refer to the following exhibits:

EXHIBIT B:

Product Requirements Document (PRD): Shop@Anywhere Bullet –
Online/Offline Integration <*Code Name: Yoda*> [Release 1.0], October 23, 2000;

EXHIBIT C:

Email from Srinivas Lingutla to Kamal Acharya; February 2, 2001;

EXHIBIT D:

Email from Srinivas Lingutla to Kamal Acharya; February 11, 2001;

EXHIBIT E:

Email from Kamla Acharya to Todd Goldman, *et al.*; February 19, 2001;

EXHIBIT F:

Email from Srinivas Lingutla to Kamal Acharya; March 6, 2001;

EXHIBIT G:

Email from Kamal Acharya to Mohsin Hussain; March 7, 2001;

EXHIBIT H:

Email from Srinivas Lingutla to Kamal Acharya; March 11, 2001;

EXHIBIT I:

Email from Srinivas Lingutla to Kamal Acharya; March 21, 2001;

EXHIBIT J:

Email from Srinivas Lingutla to Kamal Acharya; March 28, 2001;

EXHIBIT K:

Email from Kamal Acharya to Mohsin Hussain; March 28, 2001;

EXHIBIT L:

Email from Srinivas Lingutla to Kamal Acharya; April 4, 2001;

EXHIBIT M:

Email from Kamal Acharya to Mohsin Hussain; April 8, 2001;

EXHIBIT N:

Email from Srinivas Lingutla to Kamal Acharya; April 10, 2001;

EXHIBIT O:

Email from Kamal Acharya to Mohsin Hussain; April 11, 2001;

EXHIBIT P:

Email from Kamal Acharya to Mohsin Hussain; April 11, 2001;

EXHIBIT Q:

Email from Srinivas Lingutla to Kamal Acharya; April 17, 2001;

EXHIBIT R:

Email from Kamal Acharya to Mohsin Hussain; April 19, 2001;

EXHIBIT S:

Email from Kamal Acharya to Mohsin Hussain; May 4, 2001; and

EXHIBIT T:

Email from Srinivas Lingutla to Kamal Acharya; May 9, 2001.

5. I have reviewed the above-referenced EXHIBIT B through EXHIBIT T and believe that they are of such character and weight as to establish the actual reduction of practice of the subject matter of the application prior to May 4, 2001.

6. Further, I believe that the above-referenced EXHIBIT B through EXHIBIT T are of such character and weight as to establish diligence in reducing the subject matter of the application to practice from prior to December 22, 2000, through the actual reduction to practice of the subject matter of this application prior to May 4, 2001.

7. EXHIBIT A through EXHIBIT T referred to herein are attached herewith. These exhibits are also already of record in the application. These exhibits were filed with the USPTO on December 22, 2005, in one or more prior declarations under 37 CFR 1.131.

8. I have reviewed the exhibits referred to herein and believe that they are accurate.

9. I further declare that all statements herein made of my own knowledge are true, and that all statements made on information or belief are believed to be true; and further, that the statements are made with the knowledge that the making of willful or false statements or the like is punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and may jeopardize the validity of any patent issuing from the present patent application.

Advanced Planning Meeting

Vincent Tong

10/16/00

Feel the "Brick & Mortar" Force...
Online retail sales will reach only a
modest 2% of the total retail market
within the next 4 years
(Red Herring/Forrester Research 07/00)

What's the problem we are trying to solve?

- ⌘ Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00)
- ⌘ Consequently, consumers need the ability to find the best deals for an individual product from online merchants as well as from physical store nearby all-in-one-place
- ⌘ Neither AOL nor our key competitors are addressing this need

83% of all online buyers look online for the most convenient offline physical store location"
- Jupiter

"73% of online browsers indicated that they researched products online and then purchased them at a physical store" - Jupiter

Goals

SHORT-TERM (Shop@Anywhere Bullet - 6 months)

- ⌘ Make shopping easier and more convenient by helping consumers to locate nearby physical stores of “click-&-mortar” Shop@ merchant partners
- ⌘ Highlight local offerings from “click-&-mortar” merchant partners (e.g. physical store presence, local store return/pick-up for online sales)
- ⌘ Earn consumers’ trust, as they release their zipcode/address to us
- ⌘ Generate additional pages views
- ⌘ Drive local ad impressions via Digital City

LONG-TERM

- ⌘ Provide a true multi-channel (both online and offline) merchant comparison environment with store-level product pricing and availability from “click-&-mortar”, “brick-&-mortar” only, and “pure-play e-tailer”

Project Metrics

- ⌘ Deploy store locator feature and highlight local store offering for 100% of “click-&-mortar” Shop@ merchant partners in 100% of Shop@ channels, after 3 months
- ⌘ 15% of store locator users will “store” their zipcode/address for repeat usage, after 3 months
- ⌘ Generate additional 17M pages views in year 1
- ⌘ Drive \$1.3M local ad impressions via Digital City in year 1

Value Proposition

Consumers

- ⌘ Convenience! -- This will make the info needed for my purchase decision readily available (local store listings of merchants)
- ⌘ Quick access to local store content (e.g. nearby restaurants, driving direction) to satisfy my need for entertainment & instant gratification
- ⌘ In the long term, "I have a feeling that [AOL Shopping] is limiting my choices" "Let me know that I could buy a book at BN.com but I could also buy it from Harry's Tiny Bookstore on the corner" (Murmurs)
- ⌘ Bottom Line = AOL provides us with the best comparison shopping for online merchants and local stores — HIGH

Value Proposition

“Click-&-Mortar” Shop@ Merchant Partners (30% in headcount)

- ⌘ Drive sales and foot traffic to local stores
- ⌘ Make the most impact in differentiating vs. pure-play e-tailers. Proximity (touch product, need ASAP, easy return, want ASAP) is the key edge of local merchants (Red Herring/Jupiter 07/00)
- ⌘ Effectively build trust for my online unit. Offline presence is the #1 factor in developing online merchant trust (Jupiter 8/99)
- ⌘ Multi-channel customers spend avg of 20-30% more than single channel customers (Jupiter 06/00)
- ⌘ Bottom Line = AOL helps us to leverage our physical assets to attract profitable customers to shop at our online and/or offline retail channels — HIGH

The Store Locator

- ☞ Proximity Search for local stores of “click-&-mortar” merchant partners in the Shop@ environment, including Merchant Comparison and other possible areas (e.g. A-Z Store Listing)

PLUS

- ≠ User may store multiple target locations (link to UMP?)
- ≠ Local store return/pick-up policy for online sales

Product Details:

- Description:** DVD Surround Sound, Dolby Digital, 5.1ch, 1000 Lines Resolution, Single Optical Receiver, 7.1-bit Audio DAC, Digital Coaxial, Digital Optical Audio Output
- Shipping Weight:** 19.0 pounds
- Dimensions:** 11.1in x 12in x 4.5in

Retention

Consumers: HIGH
Click-&-Mortar Merchants: HIGH
Pure-play e-tailers: -ve

2-month Development Cycle (Est.)

Engineering: 3.5 pm
Engineering- Digital City: 1.5 pm
UI Designer: 0.5 pm
QA: 1.0 pm
Product Manager: 1.0 pm
Ongoing CPE: 0.25 person

Key Dependencies / Risks

- ⌘ Depends on Digital City to provide the proximity search and the localized content – *Mitigation: Set the right expectation with DCI on performance requirements, server load , their flexibility and responsiveness in updating store level content upon Shop@ merchant partner's request*
- ⌘ Privacy concern on allowing user to store zipcode/address – *Mitigation: The initial check with Kent Walker (legal) was positive. Will confirm with Kent once features are finalized*
- ⌘ Negative reaction from “pure-play” e-tailer partners – *Mitigation: Ask Account Management team for feedback*
- ⌘ Different product assortment at Web channel vs. Physical Store  store channel for a merchant – *Mitigation: create*

Open Issues

- ⌘ Can/should we deliver the “stored” user zipcode / address to UMP? – Need to check with Personalization Divlet
- ⌘ In addition to “Merchant Comparison” area (stand-alone and under Product Page), where else can “Store Locator” appear? (e.g. A-Z Store Listing, Dept Pages) – Initial feedback is possible for A-Z Store Listing, but no room for Dept Pages. Need to finalize with Kathleen May.
- ⌘ Do we need permission from merchant partner to deploy “Store Locator”? – Need to check with Acct Mgmt

What's Next?

- ⌘ Core team assignment – this week
- ⌘ Further investigate open issues and risks
- ⌘ Project Kick-off Review & PRD – week of 10/30/00

EXECUTIVE SUMMARY

Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00). The Shop@ channels have done nothing to address this need so far. There is a huge opportunity for AOL to win the online/offline integration battle vs. the competition by having Digital City and Shop@ channels joined forces. Immediately, consumers will witness a better

comparison shopping experience with the ability to easily and conveniently find nearby retail locations of "click-&-mortar" merchant partners. In the long term, we will be able to open up new revenue opportunity by moving up the value chain (e.g. enabling large manufacturers/distributors to sponsor their "brick-&-mortar" dealers). It is an important yet simple first step to the right direction.

PURPOSE OF PRD

The purpose of this document is to define the target for the product team and extended operational team. It communicates the objectives and priorities of the product so that the product team makes the best decisions. It translates/tie business objectives so that team members can clearly understand how their work contributes.

REVISION HISTORY/CHANGE SUMMARY

Release 1.0: (10/23/00) Initial draft for review by core team.

ASSOCIATED DOCUMENTS

The following documents will also be written in conjunction with this requirement document.

Design/Testing:

- Technical specifications - Kamal A.
- Usability tests - Peter G.
- Test Plan - QA lead?

Launch:

- Marketing plan - Vincent T.

Post-mortem:

- Postmortem - Vincent T.

CONCEPT AND OBJECTIVES

Goal

IMMEDIATE GOAL

Unlock the power of Digital City, AOL's crowned jewel in the localized content play, into the Shop@ space. Create a better comparison shopping experience by enabling Shop@ users to easily and conveniently find nearby retail locations of Shop@ merchant partners.

LONG TERM VISION

Provide a true "one-stop-shop" for consumers to comparison shop. They may perform product search and merchant comparison on individual products from large and small "click-&-mortar", "brick-&-mortar" only, and "pure-play e-tailer" merchants.

Problem Definition

Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00). Consequently, consumers need the ability to find the best deals for an individual product from online merchants as well as from nearby physical store all-in-one-place. The Shop@ channels are not addressing this need at the moment.

"32% of all online buyers look [online] for the most convenient off-line physical store location"
- Jupiter

"73% of online browsers indicated that they researched products online and then purchased them at a physical store" - Jupiter

Business Objectives

Categories	Objectives
Consumer Satisfaction	Increase retention by making comparison shopping easier and more convenient
Merchant Partner Satisfaction	Increase retention of "Click-&-Mortar" merchant partners by highlighting their "offline" assets
Strategic	Earn consumers' trust, as they release their zipcode/address to us
	Open up future revenue opportunities via this localized platform (e.g. move up the supply chain to add value to manufacturers and to mom-&-pop stores)
Traffic	Generate incremental pages views
Revenue	Drive local ad impressions via Digital City

Prioritized Metrics

How do we know if we succeed?

Type	Priority	Metrics
Consumer & Merchant Partner Satisfaction	H	Deploy Yoda to 100% of "click-&-mortar" Shop@ merchant partners in 100% of Shop@ channels, within 3 months after the initial launch
Consumer Satisfaction	H	Achieve a click-thru rate of 5% for the "Store Locator" feature, within 3 months after the initial launch
Strategic	M	15% of users will "store" their zipcode/address for repeat usage, within 3 months after the initial launch
Page Views	H	Generate incremental page views of 21M in year 1 and 32M in year 2 (see Product Economics for assumptions)
Revenue	H	Drive additional local ad impressions via Digital City valued at \$1.6M in year 1 and \$2.4M in year 2 (see Product Economics for assumptions)

High level constraints

Categories	Constraints
Budget	None identified (It's been approved as part of the Shop@Anywhere Bullet)
Schedule	None identified
Staffing	UI resource constraint
Merchant	None identified

MARKET ANALYSIS & OPPORUNITY

Target Users

The primary audience is the current users of Shop@ channel: (Tier 1: Shop@AOL & Shop@AOL.com. Tier 2: Shop@Netscape & Shop@CompuServe. Tier 3: Shop@Gateway.net, Shop@Spinner & Shop@Winamp) The prioritization is based on their need and desire to shop offline.

- Priority 1: "Shirley"
- Priority 2: "Steve"
- Priority 3: "Chantilly"

(See appendix for the AOL Shopping Personas)

The secondary audience is the potential traffic coming from Digital City via the Shop@AOL.com integration points. Digital City is the most trafficked local content network in the U.S. with over 6M unique users/month, 8% reach (Media Metrix, June 2000 Home/Work).

- Priority 1: "Clicks-and-mortar shoppers": Using this term loosely to describe people who research/shop online as a means to buying offline. Research discussed at the Kelsey Local Commerce Conference indicated that 60%-70% of online shopping results in offline purchase, approaching \$750 million in annual purchases within the next few years.
- Priority 2: "Shopping enthusiasts": people who love to shop and see shopping and "the thrill of the hunt" as entertainment. Includes both in-town and visitor segments (about 50% of unique users for any particular Digital City come from outside the market)
- Priority 3: "Bargain-seekers": price-driven shoppers and sales fanatics interested in where to get the best deal, coupons/special offers, and sales.

(Source: Todd Unger, Digital City. Prioritization by Vincent Tong)

Competition

The winner will be determined by its ability to seamlessly deliver the most comprehensive store-by-store product content and store content. With Digital City as the competitive advantage on the store content front, the Shop@ channels are well positioned to win the online/offline integration war. To gain the first mover advantage in gaining access to merchant's store-by-store product content, Shop@ will continue to explore opportunity to partner with technology enablers (e.g. strategic investment), who are helping "click-&-mortar" merchants to synchronize their retail channels <See Long Term Vision>

PRODUCT ECONOMICS

AOL monetizes this product directly via incremental page views to Digital City.
Please see appendix for more detail.

Summary	Jan-Dec 2001	Jan-Dec 2002
Incremental page views	21M	32M
Revenue	\$1.6M	\$2.4M
Est. based on \$75 CPM		

KEY ASSUMPTIONS

- Only traffic driven by the Merchant Comparison area's "Store Locator" feature via Product Pages and Shopping Assistant are considered here.
- Traffic via other integration points (e.g. A-Z Store Directory, Department pages) are too trivial
- Future revenue opportunity as we built this localized platform is not considered in this model
- Higher retention rate of "Click-&-Mortar" merchants are not considered in this model
- The growth rate of online buyers from Jupiter is applicable to that of our users

PRODUCT AND SERVICE

Value Proposition

Consumers

- Convenience! -- Make comparison shopping easier, as the local store listings of merchants are readily available with a click of the button at convenient places within the Shop@ environment (e.g. Merchant Comparison area)
- Quick access to entertaining and helpful local store content via Digital City's Details Page (e.g. map, driving direction, user review, professional review, store sales, coupons)
- Bottom Line = AOL provides us with a better comparison shopping experience for online merchants and local stores — HIGH

"In the long term, we should be able to expand the universe of Shop@ partners to include "brick-&-mortar" only stores. "I have a feeling that [AOL Shopping] is limiting my choices" "Let me know that I could buy a book at BN.com but I could also buy it from Harry's Tiny Bookstore on the corner" (Murmurs)

"Click-&-Mortar" Shop@ Merchant Partners (30% in headcount)

- Drive sales and foot traffic to local stores
- Make the most impact in differentiating vs. pure-play e-tailers. Proximity (touch product, need ASAP, easy return, want ASAP) is the key edge of local merchants (Red Herring/Jupiter 07/00)
- Effectively build trust for my online unit. Offline presence is the #1 factor in developing online merchant trust (Jupiter 8/99)
- Multi-channel customers spend avg of 20-30% more than single channel customers (Jupiter 06/00)
- Bottom Line = AOL helps us to leverage our physical assets to attract profitable customers to shop at our online and/or offline retail channels — HIGH

Prioritized Requirements

The purpose here is to clearly communicate prioritized requirements to engineering, UI and QA so that they can make the correct trade-offs when making and implementing design decisions. The following requirements are prioritized as follows:

- P0 = Non negotiable. It isn't a functional product without this feature.
- P1 = Critical. Product can initially exist without this feature but not for long.
- P2 = Differentiating feature that may provide significant marketing value.
- P3 = Would be nice to have.

Please also see appendix for Terms and Definitions

Summary

- Proximity Search for local stores of click-&-mortar merchant partners in the Shop@ environment, including Merchant Comparison and other possible areas (e.g. A-Z Store Directory)
- User may store multiple target locations (link to UMP)
- Indicators of merchant's local store return/pick-up policy for online sales

The mock-up shows a product page for a DVD player. The main content area lists several merchants and their prices:

- amazon.com**: 4.5 stars, Out of Stock, \$9.45, Free Shipping
- mobishop**: 3 stars, In Stock, \$9.45
- Supernine**: 3 stars, Check \$11, \$9.45, The LOWEST price on Name Brand Electronics, Guaranteed
- Walmart.com**: 4 stars, In-Store Order, \$9.45, Get it now
- State Street Direct ONLINE**: 4 stars, In Stock, \$9.45, Authorized Dealer - Same day Shipping - Chat Live with our staff.
- 800-com**: In Stock, \$9.45, Get FREE DVD MOVIES with select DVD Players while they last!

A red circle highlights the 'Authorized Reseller' section, which includes:

- ☐ Retail Store
- ☐ Store Accepts In-Store Return of Online Purchases
- ☐ Store Accepts In-Store Pick-up of Online Purchases
- ☐ Store Accepts both In-Store Pick-up and Return of Online Purchases

The 'Local Shopping' section shows a map of San Francisco with a list of nearby stores. The 'Store Detail Page' sidebar lists the following information:

- Store Name
- Address
- Phone #
- Open Hours
- User Rating
- Reviews (user / pro)
- Map & Driving Direction
- Sales/Coupon
- What's nearby... etc.
- (Powered by Digital City)

Product Page: Merchant Comparison

(This mock-up is created solely to illustrate the idea. It's not the final design.)

page 7

Requirements	Priority
DRIVE AWARENESS AT SHOP@ CHANNELS	
"Store Locator" indicator next to each "click-&-mortar" merchant partner. It triggers the proximity search feature	P0
Clearly identify the different types of in-store return/pick-up policy for online sales of each "click-&-mortar" merchant partner	P1
A) Store Accepts In-Store Return of Online Purchases	
B) Store Accepts In-Store Pick-up of Online Purchases	
C) Store Accepts Both In-Store Return and Pick-up of Online Purchases	
D) Don't know or None	
Placement in Merchant Comparison area (includes but only limited to Product Page and Shopping Assistant) across Shop@channels	P0
Placement in Department Pages across Shop@channels	P1
Placement in A-Z Store Directory across Shop@channels	P1
Display the number of nearby stores for each "click-&-mortar" merchant within the default/predefined radius of the user's "stored" target location	P2
TARGET LOCATION(S)	
Solicit user for address, zipcode or city, state (within Shop@ channels). Pre-fill the form on repeat visits with the last selection (cookie?).	P0
Enable the same functionality for "Find It Locally" ¹ feature under Shopping Search	P1
Enable and encourage user to "store" multiple target locations (e.g. home, work, grandma's house). User may easily pick any one of their target locations to perform the proximity search. Requires authentication of the corresponding membership (e.g. AOL, CompuServe, Netscape). Information will be stored as an extended UMP profile for the user so that the data will be standardized and tightly controlled and other applications can share this data (should collaborate with MapQuest and UMP owner Rizwan Ali on this).	P2
Pre-fill target location form from user's core UMP under Shop@AOL and Shop@CompuServe (if any). <Subject to Privacy Issue> ²	P3
User may define the search radius (could be stored along with the target location as well)	P3
PROXIMITY SEARCH (BY DIGITAL CITY)	
Search: With the target location, merchant name and search radius (default or user-defined) as parameters, search for the merchant partner's physical stores in the Digital City directory.	P0
Presentation of Search Result: Minimally, the search result must display store name, proximity to target location and phone number. If there is no result, user will be advised to return to select another Shop@ merchant partner. If there are more than one search result, the stores will be ranked by proximity starting with the closest one.	P0
To ensure accuracy of search result (e.g. Blockbuster Fireworks Inc. should not be returned as a search result for "Blockbuster"), the "click-&-mortar" merchant partners should be mapped to their retail outlets at the Digital City directory (e.g. add a Shop@ merchant ID to all Blockbuster stores and use this ID as search	P0

¹ "Find It Locally" resides on the Shopping Search 2.0 Result Page. Currently, it collects a zipcode from the user and passes the search's product category and the zipcode to Digital City. The result would be a list of offline merchants under the same product category and the zipcode.

² Currently, UMP (Unified Member Profile) is at its early infancy. According to UMP's Product Manager Rizwan Ali, it does not collect info from subscriber's billing profile (due to privacy issue) and depends largely on My AOL.com. Moreover, information stored at core UMP (e.g. address, birthday) also need to be assigned whether it could be shared for application outside My AOL.com or not.

parameter instead of merchant name)	
Each search result contains a direct link to the store's Details Page	P0
STORE DETAILS PAGE (BY DIGITAL CITY)	
Content Availability: With an estimated launch in mid-Dec 2000, the Details Page is the heart of Digital City's enhanced shopping directory. While the exact amount of content for each location may vary depending on Digital City's content acquisition efforts. Here is the prioritized list of content item for all "click-&-mortar" merchant partners.	
- Venue description (store name, address, phone #, & editorial)	P2
- Photo	P2
- DCI Utilities ("Map") & Driving Directions (takes the target location)	P0
- Enhanced Data – hours, accepted payment, price info, return policy, parking, cross street, upcoming events	P2
- Local Expert Reviews	P2
- Fulfillment Tools (sales, coupon) via ShoppingList.com co-brand	P1
- Shop@ Integration (static link to Shop@AOL.com)	P0
- NetBusiness Biz Card tie-in	P3
Update Content: With a one week turn-around time, a Digital City Producer should be able to update the "factual" content items of individual listing upon the request of Shop@ merchant partners via their Account Managers. These items include "Enhanced Data" & "Venue description" (except for the editorial). Moreover, the producer should also be able to handle adding a new store and deleting a "closed" one in the same time frame as well. The change should propagate across the Digital City directory.	P0
Block "Unfriendly" Advertising: With a one week turn-around time, a Digital City Producer should be able to filter out advertising deemed "unfriendly" by the Shop@merchant partners. The change should be limited to only this co-branded Details Page.	P2
THE DIGITAL CITY & SHOP@ CO-BRAND EXPERIENCE	
Until the user returns to the Shop@ channel, his/her entire experience after igniting the "Store Locator" feature will be co-branded by Digital City and the corresponding Shop@ channel	P0
The co-branded site will be stripped of all non-shopping related content to minimize distraction of user's online shopping activity. However, user can always access the entire product offerings of Digital City by clicking on the "Digital City" logo.	P1
CUSTOMER CARE	
Self Help FAQ on this feature should be readily available within the co-branded environment	P0
Consumer feedback form should be readily available within the co-branded environment. The "categorized" feedback form is a vehicle for Shop@ Product Group to collect user comments on this feature and is NOT meant to be answered by customer service.	P1
REPORTING	
# of impressions, click-thrus and empty result of the "Store Locator" feature for each "click-&-mortar" Shop@ merchant partners, per Shop@ channel-location (e.g. Product Page's Merchant Comparison at Shop@Netscape.com)	P0
# of Page Views at Digital City & Shop@ co-branded page via the "Store Locator" feature, per Shop@ channel	P0
# of Unique Users "storing" their target location for repeat usage	P1

Long Term Vision

- Seamlessly integrate the latest product information (e.g. availability, pricing) of individual physical retail locations of Shop@ merchant partners into Shop@ Product Search and Merchant Comparison all-in-one-place.
- Include product information on store-by-store level from "Click-&Mortar" merchant partners into the Datamart
- Include product information on individual "Brick-&Mortar" Mom-&Pop stores (sponsored by manufacturers?) into the Datamart
- Provide Product Page for "Specialty" items, currently un-available due to the lack of product content. With local store information, it might be compelling enough to have a Product Page for Guess Jeans.

Be patient....

Unfortunately, merchants are NOT ready yet. Most "Click-&Mortar" merchants have NOT synchronized their Web and physical store retail channels. That means they lack the ability to pinpoint the availability or even the pricing of an individual product for each of their physical stores. Echoing the "Competition" section.... To gain the first mover advantage in gaining access to merchant's store-by-store product content, Shop@ will continue to explore opportunity to partner with technology enablers (e.g. strategic investment), who are helping "click-&-mortar" merchants to synchronize their retail channels.

UI Design Goals

AOL Shopping Persona	User Experience Goals to "Find nearby stores of Shop@ merchant partners"
Shirley	<ul style="list-style-type: none"> - EASY: The "Store Locator" features are conveniently located next to all "click-&-mortar" merchant partners throughout the Shop@ channel. It's so easy to find them. - SENSE OF ACCOMPLISHMENT: a.k.a. dummy-proof. The "Store Locator" feature is so easy to use. There is no way for me to make a mistake, unless I type in the wrong target location.
Steve	<ul style="list-style-type: none"> - FAST: Once I decided that I like this product, I can quickly compare prices from online store and call up nearby local stores for pricing and availability. 2 or 3 clicks.... I am done.
Chantilly	<ul style="list-style-type: none"> - FUN: There is so much interesting content on the Details Page for this store (e.g. Local Expert reviews on this store). I can't wait to tell my sister about it.

<See Appendix: AOL Shopping Persona for details on the personas>

Other Goals:

- It is highly likely that there are different product assortment at Web channel vs. Physical store channel for a merchant. If the user is coming from the Merchant Comparison page, we need to set the right expectation with the user that the local stores might or might not carry this product and the pricing might not be the same.
- Avoid distracting consumers with other DCI content. Filter out the non-shopping related content.
- User may easily return to what they were doing at the Shop@ channel (e.g. the "Store Locator" feature could open a new window for the Digital City co-brand)
- The placement of "Store Locator" will NOT cause the Product Page to violate the merchant agreement of display at least 2 merchant at merchant comparison area above the fold.

Release Criteria

HARDWARE

The following requirements are expected to run on the following hardware platforms:
<Please see appendix>

WEB

- ☐ No P0 or P1 defects
- ☐ No misspellings or alignment errors can appear in the UI
- ☐ Proximity search results will be generated correctly at least 99% of the time
- ☐ Having the "Store Locator" on Shop@ channels does not noticeably effect the download speed
- ☐ Digital City can process proximity search request and push search results within 8 seconds at peak time, 3 seconds average
- ☐ Digital City can support an additional 5 service requests per second at peak for the proximity search
- ☐ It should take a Digital City producer a one-week turnaround time at the maximum to update store content on Details Page, adding a new store or deleting a closed store
- ☐ All help documentation (FAQ) describing "Store Locator" usage is included
- ☐ The following usability criteria will be demonstrated through user tests
 - ☐ 90% of tested users do not find "Store Locator" distracting
 - ☐ 90% of tested users understand what "Store Locator" will do for them before clicking on it
 - ☐ 90% of tested users can find the local stores of a "click-&-mortar" merchant in front of their screen without additional instruction, especially with the target location tool
 - ☐ 80% of tested users indicate that the search results and Details are useful while shopping, and that they would use it again

OPERATIONS

Operational issues and Resolutions

SUPPORT CONSUMERS

Phone	None	None	None
On-line	Self-Help FAQ	Self-Help FAQ	Self-Help FAQ

SUPPORT MERCHANT PARTNERS

<Store Info Update>

- "Click-&-Mortar" merchant partners are expected to request updates on their local store content in the Digital City database (e.g. new phone #, new store opening, store close-down, store relocation) via their *Account Managers*
- The assigned *producer* at Digital City to handle this request is TBD.
- We must be careful in setting the right expectation with merchant partners on the editorial integrity of Digital City. Digital will ONLY change the factual content items on the Details Page.

RISK AND ISSUES

Issues

Areas	Status	Issues
Legal	Open	Privacy concern on allowing user to store zipcode/address - Mitigation: The initial check with Kent Walker (legal) was positive. Will confirm with Jim Bramson and Kent Walker once features are finalized
Merchant	Open	Do we need permission from merchant partner to deploy "Store Locator"? - Need to check with Acct Mgmt
Placement	Open	In addition to "Merchant Comparison" area (stand-alone and under Product Page), where else can "Store Locator" appear? (e.g. A-Z Store Directory, Dept Pages) - Initial feedback is possible for A-Z Store Listing, but no room for Dept Pages. Need to finalize with Kathleen May.
UMP	Closed	Can/should we deliver the "stored" user zipcode / address to UMP? - Need to check with Personalization Divlet
Space Limitation	Open	On Product Pages, we are promising that 2 merchants will be display at merchant comparison area "above the fold". Need to verify with Account Services.

Risks

Areas	Risks	Contingency (Plan B)
Merchant Partner Satisfaction	Potential negative reaction from "pure-play" e-tailer partners	Ask Account Management team for feedback

Dependencies

Areas	Dependencies	Contingency (Plan B)
Internal Tech & Content Partner	Depends on Digital City to provide the proximity search and the localized content	Set the right expectation with DCI on performance requirements, server load, their flexibility and responsiveness in updating store level content upon Shop@ merchant partner's request

RESOURCE AND SCHEDULE***Schedule (Preliminary)***

Staffing (Preliminary)

Ongoing CPE	0.25 person

*pm – person-month

Appendix

Usage Estimate

KEY ASSUMPTIONS					
- Revenue from Store Locator at A-Z Store List is too trivial					
- Future revenue opportunity as we built this localized platform is not considered in this model					
- Higher retention rate of Clicks-&Mortar merchants are not considered in this model					
- Est. traffic between Aug '01 - July '02 is used for Yr 1					
- The growth rate of online buyers from Jupiter is applicable to that of AOL users					
TRAFFIC ESTIMATES					
US online buyers (Jupiter 1/00)			Page Views for Product Pages		
Yr	Online Buyers	Growth Rate	Annual	Period	
2,000	39,000,000	n/a	154,856,365	Aug 00 - July '01 (AOL e-commerce Estimates)	
2,001	52,000,000	33%	189,836,713	Yr 1 (Using AOL e-commerce est for Jan-Jul '01 and using Jupiter's Growth Rate for Aug-Dec '00)	
2,002	67,000,000	29%	233,001,150	Yr 2 (Using Jupiter's Growth Rate)	
			YEAR 1	YEAR 2	SOURCE/EXPLANATION/ASSUMPTION
			Jan 01-Dec 01	Jan 02-Dec 02	
Merchant Comparison Only Page PVs			180,836,713	233,001,150	Shopping Assistant is driving traffic to Merchant Comparison Only Page in the same rate as Search to the Product Page
Page Views (Product Page & M.C. Only Page)			361,673,426	466,002,299	
Avg # Merchants at M.C.			4.0	4.5	Shop@ M.C. team
% Click-&Mortar Merchant			30%	30%	Shop@ A-Z Store List 8/8/00
% Store Nearby User			20%	20%	Wild guess. Important
% Local Store Available at M.C.			24%	27%	(% Brick-&Mortar Merchant x % Store Nearby User) x Avg # merchants at M.C.
% User decided to pursue a merchant			30%	30%	Shop@ M.C. team
% User prefer to shop offline			75%	75%	Jupiter
% Subtotal			5.4%	6.1%	
PVs on Proximity Search Result Page (DCI)			19,530,365	28,309,640	
% Click-thru to Details Page			10%	15%	Wild guess. Need to ask DCI
PVs on Details Page (DCI)			1,953,037	4,246,446	
Total PVs			21,483,402	32,556,086	
CPM			\$75	\$75	Digital City - Shopping Category (Todd Unger)
REVENUE			\$1,611,255	\$2,441,706	
SERVER LOAD ESTIMATE					
Service Requests		For the Year	19,530,365	28,309,640	
		Peak Month (Dec) = 18%	3,515,466	5,095,735	
		Daily Avg During Peak Month	113,402	164,379	
		Peak Hour (10% of day)	11,340	16,438	
		Service Requests Per Second During Peak Hour	3.15	4.57	

Terms and Definitions

The following terms are used (and italicized) throughout the PRD, especially in the requirements section.

"Click-&-Mortar" Shop@ Merchant Partners: Shop@ merchant partners with physical retail outlets and a web store-front (e.g. BN.com)

"Brick-&-Mortar" Shop@ Merchant Partners: Merchants with physical retail outlets and no web store-front (e.g. Mom-&-Pop store)

"Pure-Play E-tailer" Shop@ Merchant Partners: Shop@ merchant partners with a web store-front but no physical retail outlets (e.g. eToys)

System Users

There are three different classes of users for the Shopping Assistant: shoppers, administrators and producers, and executives. Each class is described below. Features for shoppers will be developed first, followed by features for administrators and producers, and finally executives.

Shoppers: These are the end users of the system. They interact with the system from within the AOL and CompuServe clients. Their goal is to shop online.

Administrators and Producers: These are the users charged with the ongoing operation and maintenance of the system. These users are responsible for trouble-shooting, for adding/deleting and editing merchants and sites where Shopping Assistant services are recommended, and for performing routine maintenance. Their goal is the successful operation, maintenance and expansion of the Shopping Assistant.

Executives: Executives are interested in tracking the use and acceptability of the Shopping Assistant. Their goal is to determine how the Shopping Assistant is functioning and whether it is attaining its success criteria.

AOL Shopping Personas

<Source: Peter Gremett>

Mock-up of Digital City Details Page (not final)

The details page is the heart of Digital City's enhanced shopping directory:

[illegible]

Hardware Requirements

Unless otherwise noted, the features described in PRD are meant to run on the following hardware configuration:

Server-Side

- Operating System: Solaris 2.6 and above
- Processor: Sun E450 4 CPU
- Memory: 2 GB RAM
- Disk Space: 4 GB hard drive space

Client-Side

- Operating System: Windows: 32-bit Win95/98/Me; Win NT/2000; Whistler
- Processor: Pentium Class PC
- Memory: 16 MB RAM
- Disk Space: 48 MB hard drive space
- Screen Resolution: Minimum resolution: 640 x 480; 256 colors
- Internet Connection: Modem, 28.8

<h3>

Status for week ending 2/2/2001</h3>

1. Continued work on Local Stores design. Met with Search team and discussed

issues related to merchant database, detection of user's location and events

database.

<p>2. Started work on installation and configuration of VL5 plugin. This is

being done on landscape.mcom.com, a development server, for Magic Carpet

authentication. This is to be followed with testing of authentication for

AOL in-service users.

<p>3. Review of career development plan.

<p>4. Support/maintenance work on Shopping List. Updated the demo pages to include

all the required parameters when adding products to Shopping List.

<h4>

Next Week:</h4>

1. Continue configuration of VL5 plugin.

2. Review Local Stores design.

3. Support Shopping List.</html>

<html>

<h3>

Status for week ending 2/9/2001</h3>

1. Continued work on Local Stores design. Met with Rick Henderson and Glenn Mi to talk about modifications to the Merchant Compare service to include local store information. Finalized most of the outstanding design issues.

<p>2. Continued work on installation and configuration of VL5 plugin. Successfully configured the VL5 plugin on landscape.web.aol.com to read Magic Carpet Authentication headers (for web users).

<p>The Magic Carpet VL5 catalog is not released to production and the TurboWeb group does not yet have a test environment set up to

test new catalog which includes the latitude/longitude information.

<p>I still haven't received the mapping file for converting location information to a zip code. The person responsible in the AOLNet Ops is no longer working in the group due to reorg and I have sent mail to the manager, Steve Long, asking for the file.

<p>3. Completed focal review.

<h4>

Next Week:</h4>

1. Continue configuration of VL5 plugin.

2. Review Local Stores design.

3. Support Shopping List.</html>

EXHIBIT E

Continued experimentation with the VL5 plugin. Still waiting for the mapping file for converting location information from VL5 header to zipcode.

Shopping Widget:

Finished design doc. Design review scheduled for the next week.

Implemented class to generate XML from parsed data.

Started working on image manipulation.

Product Page Anywhere:

Finished design doc. Design review scheduled for the next week.

Completed Focal Review.

Worked on the Integrated Schedules.

Next week:

Hold design reviews.

Reexamine schedules.

Get schedule commitments from DCI and P13n divlet.

Issues:

Getting schedule commitment from DCI is still the biggest issue.

Project Management status:

<p>Accomplishments this week:

<p>- Continued work on the event codes. Merchant Comparison, Shopping Assistant,

and Wallet have event codes that still need work. Wallet has some that need to be set up with

"impact", a new tool from the NOC that allows an event to be monitored over a specified amount of time so that it only gets reported if it occurs x amount of times during x duration of

time.

- I talked to AOL San Diego (Personal Logic) to make them aware of the changes to product pages.

- Followed up with Jim Bramson on copyright requirements on the printer friendly pages.

- Met with EMC rep from Operations to review our new projects.

- Started conversations with Ops to make them aware of our new projects and get assignments. Still need to do followup.

<p>Issues:

- QCPP 2.0 has no schedule or official plans yet. However if they want to make it into Shopping Assistant for AOL 6.5, they need to start working on it now. Ellen, the new PM for

QCPP 2.0, is aware and addressing the issue.

<p>For next week:

<p>- Continue working on event codes.

- Followup with Ops on new projects. Will invite them to the Design reviews this week.

- Finish non-engineering schedules for the Shop@anywhere projects.

- Hopefully get to committed schedule by end of week.

- Kimberly-Blessing will be visiting. We should discuss the Local Stores and ShopHelp.

- Eirene Espinosa is also visiting. She is the Project manager for AOL client 6.0 refresh. Meeting with her regarding Shopping Assistant.

<h3>

Status for week ending 3/2/2001</h3>

1. On vacation from 3/1 to 3/2

<p>2. Continued work on VL5 configuration/testing. The current problem with testing for Magic Carpet authentication is that the user auth information (screen name, service type, etc) is available only for the first request to the web server. I have sent my configuration files to the vlsupport team, but no resolution, yet.

<p>3. Started making modifications to the Merchant Comparison module to include local store information.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

Escalations

None.

Accomplishments

Product Page Print & Email

Installed Search code on development server. Still some issues with
 the cache database. Continued setting up the development environment.

Worked on the Mail Handler backend code.

Met with QA team to help develop test plan.

Engineering and QA participated in the finalized UI review.

Local Store

Discussed merchant feed handling strategy with Steve and Yogi. Came up with a workable plan. Need to write down the plan and do a sanity check with others in the divlet and with DCI.

Discussed including Local Store locator on A-Z pages. The Dulles team doesn't want to spend a lot of effort into this. They agreed to include a simple store search widget.

Got familiar with the Merchant Compare code and started coding the local store UI.

Engineering and QA participated in the finalized UI review.

Shopping Widget

QA wrote first draft of the test plan.

Continued working with the P13n folks on the widget implementation details.

Reviewed Shop@Anywhere project requirements with Ops.

Meet with P13n QA folks to determine the Widget QA environment and responsibilities.

Resolve open issues with the P13n engineering team.

</html>

<h3>

Status for week ending 3/9/2001</h3>

1. Continued work on VL5 configuration/testing. Successfully completed testing of Magic Carpet Authentication. Completed coding for authentication of AOL and CS users.

<p>Submitted request for VL5 headers (in place of X-AOL headers) for the Shopping List QA machine.

<p>2. Continued modifications to the Merchant Comparison module to include local store information.

<p>3. Completed checkin of the code modifications for the enhancements to Shopping List to support CTA Banner service, after successful testing by the CTA Banner team.

<p>4. Met with Manomohan Pillai and Michael Forncrook to update them on recent modifications to Shopping List.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

<html>

<h3>

Status for week ending 3/27/2001</h3>

1. Testing still underway for Shopping List Release 1.1 on QA server. It turned out that the VL5 headers were not initially turned for the cs.com alias of the server. Currently, VL5 authentication works for both web users and in-service users (AOL and CS).

<p>We just noticed another problem, initially reported by the CTA team, where if two users sign in from a web browser in succession, the second user is authenticated as the first user!

<p>I have informed the vlsupport team of the problem. The installation of the new release of Shopping List on production servers is likely to be delayed, pending investigation of the problem.

<p>2. The Merchant Comparison module is modified to work with a text database of the local store merchants. Both the grid version and standard-html version of the MC are working now. We are awaiting the activation of the proximity search interface at DCI so that we can start sending queries to DCI to look up local stores.

<p>3. Reviewed and provided feedback for the QA Test plan for Local Stores.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

<h3>

Status for week ending 4/2/2001</h3>

1. Implemented a workaround for the recently found bug in VL5 plugin. If two users sign in from a web browser in succession, this bug results in the second user being authenticated as the first user. The problem is caused by a authentication cookie set by the VL5 plugin when the first user logs in; this cookie is not regenerated when a second user logs in, but is instead reused, resulting in the second user being authenticated as the first.

<p>The workaround clears the VL5 cookie during logout from Shopping List; a new cookie is then generated by VL5 when a new user logs in. After this workaround is tested on QA server, installation of Shopping List Release 1.1 on production servers will be scheduled.

<p>2. I started installing and running the Search service on a new UltraSparc machine; I could not run Search on my Sparc20 system, landscape, because Search software requires UltraSparc systems.

<p>The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise Ids for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

Shop@Anywhere weekly engineering status

4/4/01 - 4/10/01

<p>Local Store

<p>Escalations

None

Accomplishments

Have a working prototype of the local store grid in Product Page:

http://

landscape.web.aol.com:2300/Store_Locator_Demo.html.

It includes all the logic necessary in Search and Merchant Compare.

It uses a stub DCI page for now, pending the availability of the DCI URL to be live. It also doesn't include any of the datamart changes. The list of merchants with local stores are stored in a text file for now.

Continued working with DCI on finalizing the merchant feed spec.

Issues

Need to get better closure on technical issues. The feed spec needs to be finalized soon.

Still don't have the URL spec that has all the parameters we need to pass to DCI.

Next week

Get agreement on the merchant feed spec.

Work with UI team to finish the local store grid.

Work on first drop to QA. Need to decide if we want to wait a few days for the DCI URL to go live.

Shopping Widget

<p>Escalations

None

<p>
Accomplishments

Made changes to the XML feed based on input.

P13n team working on the Widget PSP.

Didn't have a chance to put in writing the hosting solution that Ops signed

off on. This will need a change in the image urls generated by the Extractor, since in the proposed solution the images would be server from the MyAOL servers.

Issues

There was some suggestion from Kathleen May that the image specials may be replaced with text spacial in a future redesign of the department page. This will be a problem since, as designed, we are currently scraping image specials only. Kimberly Blessing doesn't think that this change would happen anytime soon. But, we need to have a plan to deal with this possibility, before we lose the services of the widget bullet engineers.

There are some technical issues on the PSP that need to be resolved soon.

Next week

Resolve the PSP technical issues.

Have a plan for handling the text only specials.

Try to finish Netcool error handling.

Product Page Anywhere

<p>Escalations

None

Accomplishments

Spent most of the time on integration testing with Search and VL5.

Issues

QA would like to have a drop soon.

Next week

The first QA drop.

Review QA test plan.

 </html>

<h3>
</h3>

<h3>

Status for week ending 4/17/2001</h3>

1. There were a couple of problems with the configuration of VL5 on the Shopping List production servers, that resulted in the in-service users not being authenticated. After fixing the configuration, the release 1.1 of Shopping List is working fine with VL5 authentication for both VL5 and web users.

<p>2. The code for Local Stores is ready to be checked in. We are currently debating the the correct location for the checkin; on a branch of the CVS source or on the tip, after backing out the latest changes to database schema. The datamart and cache modules built from the tip of the CVS source require updates to the Datamart and DB schema on the QA and production servers.

<p>Completed printer-friendly version of the MC and LS tables.

<p>The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise Ids for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Deliver a release of Search and Datamart modules to QA for testing of Local Stores.

2. Support CTA Banner service and Shopping List.</html>

Shopping Widget

<p>Escalations

None

Accomplishments

The Extractor code committed to CVS.

Did first drop to QA.

Fixed error handling and added Netcool logging.

Reviewed the impact of text only specials and we are able to handle them fine.

Met with the P13n core team to discuss multi brand support. Also, discussed support for the widget after the widget bullet team moves on to their next project in mid May.

Issues

The widget bullet folks are strapped for resource. They can only commit 1 day a week for the shopping widget. They expect to be able to devote more time after the end of April.

The P13n core team needs to take on the shopping widget. (We have already brought it up with them)

Next week

Fix any problems found by QA.

Resolve multi brand support.

Product Page Anywhere

<p>Escalations

None

Accomplishments

First drop to QA done, with both email and print features available.

Issues

none

Next week

Fix bugs found in QA.

Re: Method and System for Integrated Online and Brick and Mortar Provider Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by June 3, 2011

Dear Mr. Acharya:

My firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which originally filed by AOL with you listed as an inventor. This application is rejected and we believe that we can overcome the rejection by establishing conception and reduction to practice of this invention by Oct. 23, 2000. You assisted in a similar process in 2005.

I have attached a copy of a new declaration, copies of Exhibits A-T (which are referred to by the new declaration – and also by the 2005 declaration), and a copy of the publication of this patent application. I have also included a return envelope which you may use to return the signed declaration to my office.

Please review these materials including all information on the new Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the new declaration in blue ink and return the signed declaration to us. The declaration should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declaration has been signed, please return it to my office in the enclosed pre-addressed envelope. Please also **fax** the signed Declaration to (206) 292-0460, or scan and **email** the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your

May 23, 2011

signed Declaration by **June 3, 2011**.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

Re: Method and System for Integrated Online and Brick and Mortar Provider
Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by July 29, 2011

Dear Mr. Acharya:

As you know, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which was originally filed by AOL with you listed as an inventor.

During our handling of the declaration discussed in our prior letter of July 12, 2011, we learned from Ms. Ellen Butler Patterson that she should not have been listed as an inventor on this patent application. Accordingly, it would be appropriate for us to file a new Declaration establishing the correct inventorship of this application.

I have thus attached a copy of a new declaration, a copy of the publication of this patent application; and copies of the amendments of (a) October 18, 2002; (b) September 23, 2003; (c) January 20, 2004; (d) October 4, 2004; (e) April 20, 2006; (f) August 9, 2006; (g) July 17, 2008; (h) December 19, 2008; (i) July 17, 2009; and (j) April 27, 2010). I have also included a return envelope which you may use to return the signed declaration to my office.

Please review these materials including all information on the new Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the new declaration in blue ink and return the signed declaration to us. The declaration should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

July 20, 2011

Page 2

Once the declaration has been signed, please return it to my office in the enclosed pre-addressed envelope. Please also fax the signed Declaration to (206) 292-0460, or scan and email the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by July 29, 2011.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

ACKNOWLEDGEMENT OF REVIEW OF PAPERS AND DUTY OF CANDOR

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claim(s), as amended by any amendment referred to above.

I acknowledge the duty to disclose all information known to me to be material to patentability as defined in Title 37, Code of Federal Regulations, Section 1.56.

PRIORITY CLAIM (35 U.S.C. § 119(a)-(d) or (f), or 365(b))

I hereby claim foreign priority benefits under Title 35, United States Code, Section 119(a)-(d) or (f), or 365(b) of any foreign application(s) for patent, inventor's or plant breeder's rights certificate(s), or 365(a) of any PCT international application which

Title 37, Code of Federal Regulations, Section 1.56
Duty to Disclose Information Material to Patentability

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct.

The Office encourages applicants to carefully examine:

(1) Prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) The closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a *prima facie* case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability.

A *prima facie* case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

(1) Each inventor named in the application;

(2) Each attorney or agent who prepares or prosecutes the application; and

(3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

UPS CampusShip: View/Print Label

1. **Print the label(s):** Select the Print button on the print dialog box that appears. Note: If your browser does not support this function select Print from the File menu to print the label.
2. **Fold the printed label at the solid line below.** Place the label in a UPS Shipping Pouch. If you do not have a pouch, affix the folded label using clear plastic shipping tape over the entire label.

3. GETTING YOUR SHIPMENT TO UPS

Customers without a Daily Pickup

Schedule a same day or future day Pickup to have a UPS driver pickup all your CampusShip packages.

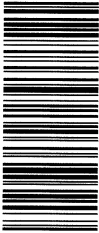

Hand the package to any UPS driver in your area.

Take your package to any location of The UPS Store®, UPS Drop Box, UPS Customer Center, UPS Alliances (Office Depot® or Staples®) or Authorized Shipping Outlet near you. Items sent via UPS Return Services(SM) (including via Ground) are also accepted at Drop Boxes. To find the location nearest you, please visit the Resources area of CampusShip and select UPS Locations.

Customers with a Daily Pickup

Your driver will pickup your shipment(s) as usual.

Re: Method and System for Integrated Online and Brick and Mortar Provider Shopping
U.S. Patent Application No. 09/975,831
Filed: Oct. 11, 2001
Our File No.: 122118-175973

Please return the signed declaration to us by Aug. 10, 2011

Dear Mr. Acharya:

As you know, my firm is handling a patent application (U.S. Patent Application No. 09/975,831, entitled "Method and System for Integrated Online and Brick and Mortar Provider Shopping") which was originally filed by AOL with you listed as an inventor.

We previously sent you a package on July 12, 2011 which included a declaration under 37 CFR 1.131 to establish dates of conception, reduction to practice, and diligence in reducing the invention to practice ("the 131 Declaration"). The July 12, 2011 package also included copies of Exhibits A-T (which are referred to by the 131 Declaration), a copy of the publication of this patent application, and a return envelope.

On July 20, 2011 we also sent you an Inventorship Declaration along with a copy of the publication of this patent application and copies of the amendments of (a) October 18, 2002; (b) September 23, 2003; (c) January 20, 2004; (d) October 4, 2004; (e) April 20, 2006; (f) August 9, 2006; (g) July 17, 2008; (h) December 19, 2008; (i) July 17, 2009; and (j) April 27, 2010; as well as a return envelope.

Unfortunately, we have not yet received your response to either of these packages. We are thus sending additional copies of the 131 Declaration, Inventorship Declaration, and above-listed supporting documents along with a return envelope which you can use to return the signed 131 Declaration and Inventorship Declaration to my Office. However, if this letter and your

Aug. 1, 2011

Page 2

response to the July 12 and July 20 packages have crossed paths in transit, please disregard the enclosed materials. We would, however, appreciate a call or email to let us know that the Declarations are in transit.

Please review these materials including all information on the 131 Declaration and Inventorship Declaration to ensure that they are complete and accurate. If all of the materials meet with your approval, please sign and date the declarations. The declarations should be signed with your first name and last name as set forth in the declaration. If you have questions concerning the documents, please contact me to discuss.

Once the declarations have been signed, please return them to my office in the enclosed pre-addressed envelope. Please also fax the signed Declaration to (206) 292-0460, or scan and email the signed Declaration to me at dchin@schwabe.com. We ask that you provide us with your signed Declaration by Aug. 10, 2011. Please note that failure to respond may be considered a refusal to sign these declarations.

If you have any questions, please do not hesitate to contact me directly. Thank you for your valuable assistance.

Sincerely,
SCHWABE, WILLIAMSON & WYATT, P.C.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:
Acharya et al.

Application No.: 09/975,831

Filed: October 11, 2001

Art Unit: 3625

For: **METHOD AND SYSTEM FOR
INTEGRATED ONLINE AND BRICK AND
MORTAR PROVIDER SHOPPING**

Examiner: Brandy A. Zukanovich

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION OF KAMAL ACHARYA UNDER 37 CFR 1.131

I, Kamal Acharya, declare and state that:

1. I am a co-inventor of the subject matter of the above-referenced U.S. Patent Application (the "application"). I make this declaration to establish:

- (A) conception of the subject matter of the application, in the United States, prior to October 16, 2000,
- (B) actual reduction of practice of the subject matter of the application, in the United States, prior to May 4, 2001, and
- (C) diligence in actually reducing the subject matter of the application to practice, in the United States, from prior to December 22, 2000, through the actual reduction to practice of the subject matter of this application prior to May 4, 2001.

2. I contributed to the conception of the subject matter of the application prior to October 16, 2000. As evidence of this conception, I refer to the following exhibit:

EXHIBIT A:

Powerpoint presentation, Shop@Anywhere Episode 2: Online/Offline
Integration *Code Name: Yoda*, October 16, 2000.

3. I have reviewed the above-referenced EXHIBIT A and believe that it is of such character and weight as to establish conception of the subject matter of the application prior to October 16, 2000.

4. I contributed to the actual reduction of practice of the subject matter of the application prior to May 4, 2001. As evidence of this actual reduction to practice, I refer to the following exhibits:

EXHIBIT B:

Product Requirements Document (PRD): Shop@Anywhere Bullet –
Online/Offline Integration <*Code Name: Yoda*> [Release 1.0], October 23, 2000;

EXHIBIT C:

Email from Srinivas Lingutla to Kamal Acharya; February 2, 2001;

EXHIBIT D:

Email from Srinivas Lingutla to Kamal Acharya; February 11, 2001;

EXHIBIT E:

Email from Kamla Acharya to Todd Goldman, *et al.*; February 19, 2001;

EXHIBIT F:

Email from Srinivas Lingutla to Kamal Acharya; March 6, 2001;

EXHIBIT G:

Email from Kamal Acharya to Mohsin Hussain; March 7, 2001;

EXHIBIT H:

Email from Srinivas Lingutla to Kamal Acharya; March 11, 2001;

EXHIBIT I:

Email from Srinivas Lingutla to Kamal Acharya; March 21, 2001;

EXHIBIT J:

Email from Srinivas Lingutla to Kamal Acharya; March 28, 2001;

EXHIBIT K:

Email from Kamal Acharya to Mohsin Hussain; March 28, 2001;

EXHIBIT L:

Email from Srinivas Lingutla to Kamal Acharya; April 4, 2001;

EXHIBIT M:

Email from Kamal Acharya to Mohsin Hussain; April 8, 2001;

EXHIBIT N:

Email from Srinivas Lingutla to Kamal Acharya; April 10, 2001;

EXHIBIT O:

Email from Kamal Acharya to Mohsin Hussain; April 11, 2001;

EXHIBIT P:

Email from Kamal Acharya to Mohsin Hussain; April 11, 2001;

EXHIBIT Q:

Email from Srinivas Lingutla to Kamal Acharya; April 17, 2001;

EXHIBIT R:

Email from Kamal Acharya to Mohsin Hussain; April 19, 2001;

EXHIBIT S:

Email from Kamal Acharya to Mohsin Hussain; May 4, 2001; and

EXHIBIT T:

Email from Srinivas Lingutla to Kamal Acharya; May 9, 2001.

5. I have reviewed the above-referenced EXHIBIT B through EXHIBIT T and believe that they are of such character and weight as to establish the actual reduction of practice of the subject matter of the application prior to May 4, 2001.

6. Further, I believe that the above-referenced EXHIBIT B through EXHIBIT T are of such character and weight as to establish diligence in reducing the subject matter of the application to practice from prior to December 22, 2000, through the actual reduction to practice of the subject matter of this application prior to May 4, 2001.

7. EXHIBIT A through EXHIBIT T referred to herein are attached herewith. These exhibits are also already of record in the application. These exhibits were filed with the USPTO on December 22, 2005, in one or more prior declarations under 37 CFR 1.131.

8. I have reviewed the exhibits referred to herein and believe that they are accurate.

9. I further declare that all statements herein made of my own knowledge are true, and that all statements made on information or belief are believed to be true; and further, that the statements are made with the knowledge that the making of willful or false statements or the like is punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and may jeopardize the validity of any patent issuing from the present patent application.

10/16/00

Feel the "Brick & Mortar" Force...
Online retail sales will reach only a
modest 2% of the total retail market
within the next 4 years
(Red Herring/Forrester Research 07/00)

What's the problem we are trying to solve?

- ⌘ Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00)
- ⌘ Consequently, consumers need the ability to find the best deals for an individual product from online merchants as well as from physical store nearby all-in-one-place
- ⌘ Neither AOL nor our key competitors are addressing this need

83% of all online buyers look online for the most convenient offline physical store location"
- Jupiter

"73% of online browsers indicated that they researched products online and then purchased them at a physical store" - Jupiter

Goals

SHORT-TERM (Shop@Anywhere Bullet - 6 months)

- ⌘ Make shopping easier and more convenient by helping consumers to locate nearby physical stores of “click-&-mortar” Shop@ merchant partners
- ⌘ Highlight local offerings from “click-&-mortar” merchant partners (e.g. physical store presence, local store return/pick-up for online sales)
- ⌘ Earn consumers’ trust, as they release their zipcode/address to us
- ⌘ Generate additional pages views
- ⌘ Drive local ad impressions via Digital City

LONG-TERM

- ⌘ Provide a true multi-channel (both online and offline) merchant comparison environment with store-level product pricing and availability from “click-&-mortar”, “brick-&-mortar” only, and “pure-play e-tailer”

Project Metrics

- ⌘ Deploy store locator feature and highlight local store offering for 100% of “click-&-mortar” Shop@ merchant partners in 100% of Shop@ channels, after 3 months
- ⌘ 15% of store locator users will “store” their zipcode/address for repeat usage, after 3 months
- ⌘ Generate additional 17M pages views in year 1
- ⌘ Drive \$1.3M local ad impressions via Digital City in year 1

Value Proposition

Consumers

- ⌘ Convenience! -- This will make the info needed for my purchase decision readily available (local store listings of merchants)
- ⌘ Quick access to local store content (e.g. nearby restaurants, driving direction) to satisfy my need for entertainment & instant gratification
- ⌘ In the long term, "I have a feeling that [AOL Shopping] is limiting my choices" "Let me know that I could buy a book at BN.com but I could also buy it from Harry's Tiny Bookstore on the corner" (Murmurs)
- ⌘ Bottom Line = AOL provides us with the best comparison shopping for online merchants and local stores — HIGH

Value Proposition

“Click-&-Mortar” Shop@ Merchant Partners (30% in headcount)

- ⌘ Drive sales and foot traffic to local stores
- ⌘ Make the most impact in differentiating vs. pure-play e-tailers. Proximity (touch product, need ASAP, easy return, want ASAP) is the key edge of local merchants (Red Herring/Jupiter 07/00)
- ⌘ Effectively build trust for my online unit. Offline presence is the #1 factor in developing online merchant trust (Jupiter 8/99)
- ⌘ Multi-channel customers spend avg of 20-30% more than single channel customers (Jupiter 06/00)
- ⌘ Bottom Line = AOL helps us to leverage our physical assets to attract profitable customers to shop at our online and/or offline retail channels — HIGH

The Store Locator

- ☞ Proximity Search for local stores of “click-&-mortar” merchant partners in the Shop@ environment, including Merchant Comparison and other possible areas (e.g. A-Z Store Listing)

PLUS

- ☞ User may store multiple target locations (link to UMP?)
- ☞ Local store return/pick-up policy for online sales

The screenshot displays the Shop@ Store Locator interface. At the top, there's a search bar with 'DVD Surround Sound' entered. Below the search bar, a list of results is shown, including 'amazon.com', 'Free Shipping', 'mobshop', 'Store Name', and '800.com'. Each result includes a star rating, 'Out of Stock' status, and a price. A large arrow points from the 'Store Name' result to a detailed view of the 'Store Detail Page' on the right. This page includes the store's name, address, phone number, open hours, user rating, reviews, map, and driving directions. A dashed box highlights the 'Store Detail Page' section.

Store Detail Page

- Store Name
- Address
- Phone #
- Open Hours
- User Rating
- Reviews (user / pro)
- Map & Driving Direction
- Sales/Coupon
- What's nearby...etc (Powered by Digital City)

Product Page: Merchant Comparison

(This mock-up is created solely to illustrate the idea. It's not the final

The Long Term Vision (outside the scope of this bullet)

- ⌘ Provide a true multi-channel (both online and offline) merchant comparison environment with the latest store-level product pricing and availability info from “click-&-mortar”, “brick-&-mortar” only, and “pure-play e-tailer”

Cost and Benefit

Revenue & Traffic Impact

Generate additional revenue in 3rd quarter by

Generate additional \$2M page views
impr 11/3/24/11/10/11

Open up new revenue opportunities via
this localized platform

Did I mention Y! MSN
and Amazon don't have it?

Retention

Consumers: HIGH
Click-&-Mortar Merchants: HIGH
Pure-play e-tailers: -ve

2-month Development Cycle (Est.)

Engineering: 3.5 pm
Engineering- Digital City: 1.5 pm
UI Designer: 0.5 pm
QA: 1.0 pm
Product Manager: 1.0 pm
Ongoing CPE: 0.25 person

Key Dependencies / Risks

- ⌘ Depends on Digital City to provide the proximity search and the localized content – *Mitigation: Set the right expectation with DCI on performance requirements, server load , their flexibility and responsiveness in updating store level content upon Shop@ merchant partner's request*
- ⌘ Privacy concern on allowing user to store zipcode/address – *Mitigation: The initial check with Kent Walker (legal) was positive. Will confirm with Kent once features are finalized*
- ⌘ Negative reaction from “pure-play” e-tailer partners – *Mitigation: Ask Account Management team for feedback*
- ⌘ Different product assortment at Web channel vs. Physical Store  store channel for a merchant – *Mitigation: create*

Open Issues

- ⌘ Can/should we deliver the “stored” user zipcode / address to UMP? – Need to check with Personalization Divlet
- ⌘ In addition to “Merchant Comparison” area (stand-alone and under Product Page), where else can “Store Locator” appear? (e.g. A-Z Store Listing, Dept Pages) – Initial feedback is possible for A-Z Store Listing, but no room for Dept Pages. Need to finalize with Kathleen May.
- ⌘ Do we need permission from merchant partner to deploy “Store Locator”? – Need to check with Acct Mgmt

What's Next?

- ⌘ Core team assignment – this week
- ⌘ Further investigate open issues and risks
- ⌘ Project Kick-off Review & PRD – week of 10/30/00

EXECUTIVE SUMMARY

Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00). The Shop@ channels have done nothing to address this need so far. There is a huge opportunity for AOL to win the online/offline integration battle vs. the competition by having Digital City and Shop@ channels joined forces. Immediately, consumers will witness a better

comparison shopping experience with the ability to easily and conveniently find nearby retail locations of "click-&-mortar" merchant partners. In the long term, we will be able to open up new revenue opportunity by moving up the value chain (e.g. enabling large manufacturers/distributors to sponsor their "brick-&-mortar" dealers). It is an important yet simple first step to the right direction.

PURPOSE OF PRD

The purpose of this document is to define the target for the product team and extended operational team. It communicates the objectives and priorities of the product so that the product team makes the best decisions. It translates/tie business objectives so that team members can clearly understand how their work contributes.

REVISION HISTORY/CHANGE SUMMARY

Release 1.0: (10/23/00) Initial draft for review by core team.

ASSOCIATED DOCUMENTS

The following documents will also be written in conjunction with this requirement document.

Design/Testing:

- Technical specifications- Kamal A.
- Usability tests – Peter G.
- Test Plan – QA lead?

Launch:

- Marketing plan – Vincent T.

Post-mortem:

- Postmortem - Vincent T.

CONCEPT AND OBJECTIVES

Goal

IMMEDIATE GOAL

Unlock the power of Digital City, AOL's crowned jewel in the localized content play, into the Shop@ space. Create a better comparison shopping experience by enabling Shop@ users to easily and conveniently find nearby retail locations of Shop@ merchant partners.

LONG TERM VISION

Provide a true "one-stop-shop" for consumers to comparison shop. They may perform product search and merchant comparison on individual products from large and small "click-&-mortar", "brick-&-mortar" only, and "pure-play e-tailer" merchants.

Problem Definition

Consumers will spend \$199 billion online in 2005, but they will spend more than 3 times that offline as a direct result of online research (Jupiter 06/00). Consequently, consumers need the ability to find the best deals for an individual product from online merchants as well as from nearby physical store all-in-one-place. The Shop@ channels are not addressing this need at the moment.

"32% of all online buyers look [online] for the most convenient off-line physical store location"
- Jupiter

"73% of online browsers indicated that they researched products online and then purchased them at a physical store" - Jupiter

Business Objectives

Categories	Objectives
Consumer Satisfaction	Increase retention by making comparison shopping easier and more convenient
Merchant Partner Satisfaction	Increase retention of "Click-&-Mortar" merchant partners by highlighting their "offline" assets
Strategic	Earn consumers' trust, as they release their zipcode/address to us
	Open up future revenue opportunities via this localized platform (e.g. move up the supply chain to add value to manufacturers and to mom-&-pop stores)
Traffic	Generate incremental pages views
Revenue	Drive local ad impressions via Digital City

Prioritized Metrics

How do we know if we succeed?

Type	Priority	Metrics
Consumer & Merchant Partner Satisfaction	H	Deploy Yoda to 100% of "click-&-mortar" Shop@ merchant partners in 100% of Shop@ channels, within 3 months after the initial launch
Consumer Satisfaction	H	Achieve a click-thru rate of 5% for the "Store Locator" feature, within 3 months after the initial launch
Strategic	M	15% of users will "store" their zipcode/address for repeat usage, within 3 months after the initial launch
Page Views	H	Generate incremental page views of 21M in year 1 and 32M in year 2 (see Product Economics for assumptions)
Revenue	H	Drive additional local ad impressions via Digital City valued at \$1.6M in year 1 and \$2.4M in year 2 (see Product Economics for assumptions)

High level constraints

Categories	Constraints
Budget	None identified (It's been approved as part of the Shop@Anywhere Bullet)
Schedule	None identified
Staffing	UI resource constraint
Merchant	None identified

MARKET ANALYSIS & OPPORUNITY

Target Users

The primary audience is the current users of Shop@ channel: (Tier 1: Shop@AOL & Shop@AOL.com. Tier 2: Shop@Netscape & Shop@CompuServe. Tier 3: Shop@Gateway.net, Shop@Spinner & Shop@Winamp) The prioritization is based on their need and desire to shop offline.

- Priority 1: "Shirley"
- Priority 2: "Steve"
- Priority 3: "Chantilly"

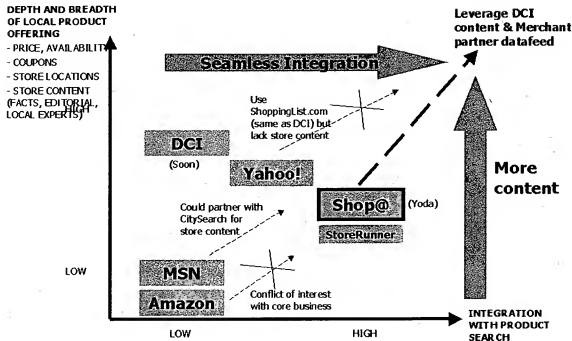

(See appendix for the AOL Shopping Personas)

The secondary audience is the potential traffic coming from Digital City via the Shop@AOL.com integration points. Digital City is the most trafficked local content network in the U.S. with over 6M unique users/month, 8% reach (Media Metrix, June 2000 Home/Work).

- Priority 1: "Clicks-and-mortar shoppers": Using this term loosely to describe people who research/shop online as a means to buying offline. Research discussed at the Kelsey Local Commerce Conference indicated that 60%-70% of online shopping results in offline purchase, approaching \$750 million in annual purchases within the next few years.
- Priority 2: "Shopping enthusiasts": people who love to shop and see shopping and "the thrill of the hunt" as entertainment. Includes both in-town and visitor segments (about 50% of unique users for any particular Digital City come from outside the market)
- Priority 3: "Bargain-seekers": price-driven shoppers and sales fanatics interested in where to get the best deal, coupons/special offers, and sales.

(Source: Todd Unger, Digital City. Prioritization by Vincent Tong)

Competition

The winner will be determined by its ability to seamlessly deliver the most comprehensive store-by-store product content and store content. With Digital City as the competitive advantage on the store content front, the Shop@ channels are well positioned to win the online/offline integration war. To gain the first mover advantage in gaining access to merchant's store-by-store product content, Shop@ will continue to explore opportunity to partner with technology enablers (e.g. strategic investment), who are helping "click-&-mortar" merchants to synchronize their retail channels <See Long Term Vision>

PRODUCT ECONOMICS

AOL monetizes this product directly via incremental page views to Digital City.
Please see appendix for more detail.

Summary	Jan-Dec 2001	Jan-Dec 2002
Incremental page views	21M	32M
Revenue	\$1.6M	\$2.4M
Est. based on \$75 CPM		

KEY ASSUMPTIONS

- Only traffic driven by the Merchant Comparison area's "Store Locator" feature via Product Pages and Shopping Assistant are considered here.
- Traffic via other integration points (e.g. A-Z Store Directory, Department pages) are too trivial
- Future revenue opportunity as we built this localized platform is not considered in this model
- Higher retention rate of "Click-&-Mortar" merchants are not considered in this model
- The growth rate of online buyers from Jupiter is applicable to that of our users

PRODUCT AND SERVICE

Value Proposition

Consumers

- Convenience! -- Make comparison shopping easier, as the local store listings of merchants are readily available with a click of the button at convenient places within the Shop@ environment (e.g. Merchant Comparison area)
- Quick access to entertaining and helpful local store content via Digital City's Details Page (e.g. map, driving direction, user review, professional review, store sales, coupons)
- Bottom Line = AOL provides us with a better comparison shopping experience for online merchants and local stores — HIGH

"In the long term, we should be able to expand the universe of Shop@ partners to include "brick-&-mortar" only stores. "I have a feeling that [AOL Shopping] is limiting my choices" "Let me know that I could buy a book at BN.com but I could also buy it from Harry's Tiny Bookstore on the corner" (Murmurs)

"Click-&-Mortar" Shop@ Merchant Partners (30% in headcount)

- Drive sales and foot traffic to local stores
- Make the most impact in differentiating vs. pure-play e-tailers. Proximity (touch product, need ASAP, easy return, want ASAP) is the key edge of local merchants (Red Herring/Jupiter 07/00)
- Effectively build trust for my online unit. Offline presence is the #1 factor in developing online merchant trust (Jupiter 8/99)
- Multi-channel customers spend avg of 20-30% more than single channel customers (Jupiter 06/00)
- Bottom Line = AOL helps us to leverage our physical assets to attract profitable customers to shop at our online and/or offline retail channels — HIGH

Prioritized Requirements

The purpose here is to clearly communicate prioritized requirements to engineering, UI and QA so that they can make the correct trade-offs when making and implementing design decisions. The following requirements are prioritized as follows:

- P0 = Non negotiable. It isn't a functional product without this feature.
- P1 = Critical. Product can initially exist without this feature but not for long.
- P2 = Differentiating feature that may provide significant marketing value.
- P3 = Would be nice to have.

Please also see appendix for Terms and Definitions

Summary

- Proximity Search for local stores of click-&-mortar merchant partners in the Shop@ environment, including Merchant Comparison and other possible areas (e.g. A-Z Store Directory)
- User may store multiple target locations (link to UMP)
- Indicators of merchant's local store return/pick-up policy for online sales

Product Page: Merchant Comparison

(This mock-up is created solely to illustrate the idea. It's not the final design.)

page 7

Requirements	Priority
DRIVE AWARENESS AT SHOP@ CHANNELS	
"Store Locator" indicator next to each "click-&-mortar" merchant partner. It triggers the proximity search feature	P0
Clearly identify the different types of in-store return/pick-up policy for online sales of each "click-&-mortar" merchant partner	P1
A) Store Accepts In-Store Return of Online Purchases	
B) Store Accepts In-Store Pick-up of Online Purchases	
C) Store Accepts Both In-Store Return and Pick-up of Online Purchases	
D) Don't know or None	
Placement in Merchant Comparison area (includes but only limited to Product Page and Shopping Assistant) across Shop@channels	P0
Placement in Department Pages across Shop@channels	P1
Placement in A-Z Store Directory across Shop@channels	P1
Display the number of nearby stores for each "click-&-mortar" merchant within the default/predefined radius of the user's "stored" target location	P2
TARGET LOCATION(S)	
Solicit user for address, zipcode or city, state (within Shop@ channels). Pre-fill the form on repeat visits with the last selection (cookie?).	P0
Enable the same functionality for "Find It Locally" ¹ feature under Shopping Search	P1
Enable and encourage user to "store" multiple target locations (e.g. home, work, grandma's house). User may easily pick any one of their target locations to perform the proximity search. Requires authentication of the corresponding membership (e.g. AOL, CompuServe, Netscape). Information will be stored as an extended UMP profile for the user so that the data will be standardized and tightly controlled and other applications can share this data (should collaborate with MapQuest and UMP owner Rizwan Ali on this).	P2
Pre-fill target location form from user's core UMP under Shop@AOL and Shop@CompuServe (if any). <Subject to Privacy Issue> ²	P3
User may define the search radius (could be stored along with the target location as well)	P3
PROXIMITY SEARCH (BY DIGITAL CITY)	
Search: With the target location, merchant name and search radius (default or user-defined) as parameters, search for the merchant partner's physical stores in the Digital City directory.	P0
Presentation of Search Result: Minimally, the search result must display store name, proximity to target location and phone number. If there is no result, user will be advised to return to select another Shop@ merchant partner. If there are more than one search result, the stores will be ranked by proximity starting with the closest one.	P0
To ensure accuracy of search result (e.g. Blockbuster Fireworks Inc. should not be returned as a search result for "Blockbuster"), the "click-&-mortar" merchant partners should be mapped to their retail outlets at the Digital City directory (e.g. add a Shop@ merchant ID to all Blockbuster stores and use this ID as search	P0

¹ "Find It Locally" resides on the Shopping Search 2.0 Result Page. Currently, it collects a zipcode from the user and passes the search's product category and the zipcode to Digital City. The result would be a list of offline merchants under the same product category and the zipcode.

² Currently, UMP (Unified Member Profile) is at its early infancy. According to UMP's Product Manager Rizwan Ali, it does not collect info from subscriber's billing profile (due to privacy issue) and depends largely on My AOL.com. Moreover, information stored at core UMP (e.g. address, birthday) also need to be assigned whether it could be shared for application outside My AOL.com or not.

parameter instead of merchant name)	
Each search result contains a direct link to the store's Details Page	P0
STORE DETAILS PAGE (BY DIGITAL CITY)	
Content Availability: With an estimated launch in mid-Dec 2000, the Details Page is the heart of Digital City's enhanced shopping directory. While the exact amount of content for each location may vary depending on Digital City's content acquisition efforts. Here is the prioritized list of content item for all "click-&-mortar" merchant partners.	
- Venue description (store name, address, phone #, & editorial)	P2
- Photo	P2
- DCI Utilities ("Map") & Driving Directions (takes the target location)	P0
- Enhanced Data – hours, accepted payment, price info, return policy, parking, cross street, upcoming events	P2
- Local Expert Reviews	P2
- Fulfillment Tools (sales, coupon) via ShoppingList.com co-brand	P1
- Shop@ Integration (static link to Shop@AOL.com)	P0
- NetBusiness Biz Card tie-in	P3
Update Content: With a one week turn-around time, a Digital City Producer should be able to update the "factual" content items of individual listing upon the request of Shop@ merchant partners via their Account Managers. These items include "Enhanced Data" & "Venue description" (except for the editorial). Moreover, the producer should also be able to handle adding a new store and deleting a "closed" one in the same time frame as well. The change should propagate across the Digital City directory.	P0
Block "Unfriendly" Advertising: With a one week turn-around time, a Digital City Producer should be able to filter out advertising deemed "unfriendly" by the Shop@merchant partners. The change should be limited to only this co-branded Details Page.	P2
THE DIGITAL CITY & SHOP@ CO-BRAND EXPERIENCE	
Until the user returns to the Shop@ channel, his/her entire experience after igniting the "Store Locator" feature will be co-branded by Digital City and the corresponding Shop@ channel	P0
The co-branded site will be stripped of all non-shopping related content to minimize distraction of user's online shopping activity. However, user can always access the entire product offerings of Digital City by clicking on the "Digital City" logo.	P1
CUSTOMER CARE	
Self Help FAQ on this feature should be readily available within the co-branded environment	P0
Consumer feedback form should be readily available within the co-branded environment. The "categorized" feedback form is a vehicle for Shop@ Product Group to collect user comments on this feature and is NOT meant to be answered by customer service.	P1
REPORTING	
# of impressions, click-thrus and empty result of the "Store Locator" feature for each "click-&-mortar" Shop@ merchant partners, per Shop@ channel-location (e.g. Product Page's Merchant Comparison at Shop@Netscape.com)	P0
# of Page Views at Digital City & Shop@ co-branded page via the "Store Locator" feature, per Shop@ channel	P0
# of Unique Users "storing" their target location for repeat usage	P1

Long Term Vision

- Seamlessly integrate the latest product information (e.g. availability, pricing) of individual physical retail locations of Shop@ merchant partners into Shop@ Product Search and Merchant Comparison all-in-one-place.
- Include product information on store-by-store level from "Click-&Mortar" merchant partners into the Datamart
- Include product information on individual "Brick-&Mortar" Mom-&Pop stores (sponsored by manufacturers?) into the Datamart
- Provide Product Page for "Specialty" items, currently un-available due to the lack of product content. With local store information, it might be compelling enough to have a Product Page for Guess Jeans.

Be patient....

Unfortunately, merchants are NOT ready yet. Most "Click-&Mortar" merchants have NOT synchronized their Web and physical store retail channels. That means they lack the ability to pinpoint the availability or even the pricing of an individual product for each of their physical stores. Echoing the "Competition" section...: To gain the first mover advantage in gaining access to merchant's store-by-store product content, Shop@ will continue to explore opportunity to partner with technology enablers (e.g. strategic investment), who are helping "click-&-mortar" merchants to synchronize their retail channels.

UI Design Goals

AOL Shopping Persona	User Experience Goals to "Find nearby stores of Shop@ merchant partners"
Shirley	<ul style="list-style-type: none"> - EASY: The "Store Locator" features are conveniently located next to all "click-&-mortar" merchant partners throughout the Shop@ channel. It's so easy to find them. - SENSE OF ACCOMPLISHMENT: a.k.a. dummy-proof. The "Store Locator" feature is so easy to use. There is no way for me to make a mistake, unless I type in the wrong target location.
Steve	<ul style="list-style-type: none"> - FAST: Once I decided that I like this product, I can quickly compare prices from online store and call up nearby local stores for pricing and availability. 2 or 3 clicks.... I am done.
Chantilly	<ul style="list-style-type: none"> - FUN: There is so much interesting content on the Details Page for this store (e.g. Local Expert reviews on this store). I can't wait to tell my sister about it.

<See Appendix: AOL Shopping Persona for details on the personas>

Other Goals:

- It is highly likely that there are different product assortment at Web channel vs. Physical store channel for a merchant. If the user is coming from the Merchant Comparison page, we need to set the right expectation with the user that the local stores might or might not carry this product and the pricing might not be the same.
- Avoid distracting consumers with other DCI content. Filter out the non-shopping related content.
- User may easily return to what they were doing at the Shop@ channel (e.g. the "Store Locator" feature could open a new window for the Digital City co-brand)
- The placement of "Store Locator" will NOT cause the Product Page to violate the merchant agreement of display at least 2 merchant at merchant comparison area above the fold.

Release Criteria

HARDWARE

The following requirements are expected to run on the following hardware platforms:

<Please see appendix>

WEB

- ☐ No P0 or P1 defects
- ☐ No misspellings or alignment errors can appear in the UI
- ☐ Proximity search results will be generated correctly at least 99% of the time
- ☐ Having the "Store Locator" on Shop@ channels does not noticeably effect the download speed
- ☐ Digital City can process proximity search request and push search results within 8 seconds at peak time, 3 seconds average
- ☐ Digital City can support an additional 5 service requests per second at peak for the proximity search
- ☐ It should take a Digital City producer a one-week turnaround time at the maximum to update store content on Details Page, adding a new store or deleting a closed store
- ☐ All help documentation (FAQ) describing "Store Locator" usage is included
- ☐ The following usability criteria will be demonstrated through user tests
 - ☐ 90% of tested users do not find "Store Locator" distracting
 - ☐ 90% of tested users understand what "Store Locator" will do for them before clicking on it
 - ☐ 90% of tested users can find the local stores of a "click-&-mortar" merchant in front of their screen without additional instruction, especially with the target location tool
 - ☐ 80% of tested users indicate that the search results and Details are useful while shopping, and that they would use it again

OPERATIONS

Operational issues and Resolutions

SUPPORT CONSUMERS

Support	Tier 1: Shop@AOL & Shop@AOL.com	Tier 2: Shop@Netscape & Shop@CompuServe	Tier 3: Shop@Gateway net, Shop@Spinner & Shop@Winamp
Email	Feedback Form (not meant to be answered by customer service)	Feedback Form (not meant to be answered by customer service)	Feedback Form (not meant to be answered by customer service)
Phone	None	None	None
On-line	Self-Help FAQ	Self-Help FAQ	Self-Help FAQ

SUPPORT MERCHANT PARTNERS

<Store Info Update>

- "Click-&-Mortar" merchant partners are expected to request updates on their local store content in the Digital City database (e.g. new phone #, new store opening, store close-down, store relocation) via their *Account Managers*
- The assigned *producer* at Digital City to handle this request is TBD.
- We must be careful in setting the right expectation with merchant partners on the editorial integrity of Digital City. Digital will ONLY change the factual content items on the Details Page.

RISK AND ISSUES

Issues

Areas	Status	Issues
Legal	Open	Privacy concern on allowing user to store zipcode/address - Mitigation: The initial check with Kent Walker (legal) was positive. Will confirm with Jim Bramson and Kent Walker once features are finalized
Merchant	Open	Do we need permission from merchant partner to deploy "Store Locator"? - Need to check with Acct Mgmt
Placement	Open	In addition to "Merchant Comparison" area (stand-alone and under Product Page), where else can "Store Locator" appear? (e.g. A-Z Store Directory, Dept Pages) - Initial feedback is possible for A-Z Store Listing, but no room for Dept Pages. Need to finalize with Kathleen May.
UMP	Closed	Can/should we deliver the "stored" user zipcode / address to UMP? - Need to check with Personalization Divlet
Space Limitation	Open	On Product Pages, we are promising that 2 merchants will be display at merchant comparison area "above the fold". Need to verify with Account Services.

Risks

Areas	Risks	Contingency (Plan B)
Merchant Partner Satisfaction	Potential negative reaction from "pure-play" e-tailer partners	Ask Account Management team for feedback

Dependencies

Areas	Dependencies	Contingency (Plan B)
Internal Tech & Content Partner	Depends on Digital City to provide the proximity search and the localized content	Set the right expectation with DCI on performance requirements, server load, their flexibility and responsiveness in updating store level content upon Shop@ merchant partner's request

RESOURCE AND SCHEDULE***Schedule (Preliminary)***

Staffing (Preliminary)

2-month Development Cycle (Est.)

Engineering	3.5 pm*
Engineering - Digital City	1.5 pm
UI Designer	0.5 pm
QA	1 pm
Product Manager	1 pm
Ongoing CPE	0.25 person

*pm – person-month

Appendix

Usage Estimate

KEY ASSUMPTIONS					
- Revenue from Store Locator at A-Z Store List is too trivial					
- Future revenue opportunity as we built this localized platform is not considered in this model					
- Higher retention rate of Clicks-&Mortar merchants are not considered in this model					
- Est. traffic between Aug 01 - July 02 is used for Yr 1					
- The growth rate of online buyers from Jupiter is applicable to that of AOL users					
TRAFFIC ESTIMATES					
US online buyers (Jupiter 1/00)			Page Views for Product Pages		
Yr	Online Buyers	Growth Rate	Annual	Period	
2,000	39,000,000	n/a	154,856,365	Aug 00 - July 01 (AOL e-commerce Estimates)	
2,001	52,000,000	33%	189,836,713	Yr 1 (Using AOL e-commerce est for Jan-Jul '01 and using Jupiter's Growth Rate for Aug-Dec '00)	
2,002	67,000,000	29%	233,001,150	Yr 2 (Using Jupiter's Growth Rate)	
			YEAR 1	YEAR 2	SOURCE/EXPLANATION/ASSUMPTION
			Jan 01-Dec 01	Jan 02-Dec 02	
Merchant Comparison Only Page PVs			180,836,713	233,001,150	Shopping Assistant is driving traffic to Merchant Comparison Only Page in the same rate as Search to the Product Page
Page Views (Product Page & M.C. Only Page)			361,673,426	466,002,299	
Avg # Merchants at M.C.			4.0	4.5	Shop@ M.C. team
% Click-&Mortar Merchant			30%	30%	Shop@ A-Z Store List 8/8/00
% Store Nearby User			20%	20%	Wild guess. Important
% Local Store Available at M.C.			24%	27%	(% Brick-&Mortar Merchant x % Store Nearby User) x Avg # merchants at M.C.
% User decided to pursue a merchant			30%	30%	Shop@ M.C. team
% User prefer to shop offline			75%	75%	Jupiter
% Subtotal			5.4%	6.1%	
PVs on Proximity Search Result Page (DCI)			19,530,365	28,309,640	
% Click-thru to Details Page			10%	15%	Wild guess. Need to ask DCI
PVs on Details Page (DCI)			1,953,037	4,246,446	
Total PVs			21,483,402	32,556,086	
CPM			\$75	\$75	Digital City - Shopping Category (Todd Unger)
REVENUE			\$1,611,255	\$2,441,706

		Peak Month (Dec) = 18%	3,515,466	5,095,735	
		Daily Avg During Peak Month	113,402	164,379	
		Peak Hour (10% of day)	11,340	16,438	
		Service Requests Per Second During Peak Hour	3.15	4.57	

Terms and Definitions

The following terms are used (and italicized) throughout the PRD, especially in the requirements section.

"Click-&-Mortar" Shop@ Merchant Partners: Shop@ merchant partners with physical retail outlets and a web store-front (e.g. BN.com)

"Brick-&-Mortar" Shop@ Merchant Partners: Merchants with physical retail outlets and no web store-front (e.g. Mom-&-Pop store)

"Pure-Play E-tailer" Shop@ Merchant Partners: Shop@ merchant partners with a web store-front but no physical retail outlets (e.g. eToys)

System Users

There are three different classes of users for the Shopping Assistant: shoppers, administrators and producers, and executives. Each class is described below. Features for shoppers will be developed first, followed by features for administrators and producers, and finally executives.

Shoppers: These are the end users of the system. They interact with the system from within the AOL and CompuServe clients. Their goal is to shop online.

Administrators and Producers: These are the users charged with the ongoing operation and maintenance of the system. These users are responsible for trouble-shooting, for adding/deleting and editing merchants and sites where Shopping Assistant services are recommended, and for performing routine maintenance. Their goal is the successful operation, maintenance and expansion of the Shopping Assistant.

Executives: Executives are interested in tracking the use and acceptability of the Shopping Assistant. Their goal is to determine how the Shopping Assistant is functioning and whether it is attaining its success criteria.

AOL Shopping Personas

Mock-up of Digital City Details Page (not final)

The details page is the heart of Digital City's enhanced shopping directory:

[illegible]

Hardware Requirements

Unless otherwise noted, the features described in PRD are meant to run on the following hardware configuration:

Server-Side

- Operating System: Solaris 2.6 and above
- Processor: Sun E450 4 CPU
- Memory: 2 GB RAM
- Disk Space: 4 GB hard drive space

Client-Side

- Operating System: Windows: 32-bit Win95/98/Me; Win NT/2000; Whistler
- Processor: Pentium Class PC
- Memory: 16 MB RAM
- Disk Space: 48 MB hard drive space
- Screen Resolution: Minimum resolution: 640 x 480; 256 colors
- Internet Connection: Modem, 28.8

<html>

<h3>

Status for week ending 2/9/2001</h3>

1. Continued work on Local Stores design. Met with Rick Henderson and Glenn Mi to talk about modifications to the Merchant Compare service to include local store information. Finalized most of the outstanding design issues.

<p>2. Continued work on installation and configuration of VL5 plugin. Successfully configured the VL5 plugin on landscape.web.aol.com to read Magic Carpet Authentication headers (for web users).

<p>The Magic Carpet VL5 catalog is not released to production and the TurboWeb group does not yet have a test environment set up to

test new catalog which includes the latitude/longitude information.

<p>I still haven't received the mapping file for converting location information to a zip code. The person responsible in the AOLNet Ops is no longer working in the group due to reorg and I have sent mail to the manager, Steve Long, asking for the file.

<p>3. Completed focal review.

<h4>

Next Week:</h4>

1. Continue configuration of VL5 plugin.

2. Review Local Stores design.

3. Support Shopping List.</html>

EXHIBIT E

Continued experimentation with the VL5 plugin. Still waiting for the mapping file for converting location information from VL5 header to zipcode.

Shopping Widget:

Finished design doc. Design review scheduled for the next week.

Implemented class to generate XML from parsed data.

Started working on image manipulation.

Product Page Anywhere:

Finished design doc. Design review scheduled for the next week.

Completed Focal Review.

Worked on the Integrated Schedules.

Next week:

Hold design reviews.

Reexamine schedules.

Get schedule commitments from DCI and P13n divlet.

Issues:

Getting schedule commitment from DCI is still the biggest issue.

Project Management status:

<p>Accomplishments this week:

<p>- Continued work on the event codes. Merchant Comparison, Shopping Assistant,

and Wallet have event codes that still need work. Wallet has some that need to be set up with

"impact", a new tool from the NOC that allows an event to be monitored over a specified amount of time so that it only gets reported if it occurs x amount of times during x duration of

time.

- I talked to AOL San Diego (Personal Logic) to make them aware of the changes to product pages.

- Followed up with Jim Bramson on copyright requirements on the printer friendly pages.

- Met with EMC rep from Operations to review our new projects.

- Started conversations with Ops to make them aware of our new projects and get assignments. Still need to do followup.

<p>Issues:

- QCPP 2.0 has no schedule or official plans yet. However if they want to make it into Shopping Assistant for AOL 6.5, they need to start working on it now. Ellen, the new PM for

QCPP 2.0, is aware and addressing the issue.

<p>For next week:

<p>- Continue working on event codes.

- Followup with Ops on new projects. Will invite them to the Design reviews this week.

- Finish non-engineering schedules for the Shop@anywhere projects.

- Hopefully get to committed schedule by end of week.

- Kimberly-Blessing will be visiting. We should discuss the Local Stores and ShopHelp.

- Eirene Espinosa is also visiting. She is the Project manager for AOL client 6.0 refresh. Meeting with her regarding Shopping Assistant.

<h3>

Status for week ending 3/2/2001</h3>

1. On vacation from 3/1 to 3/2

<p>2. Continued work on VL5 configuration/testing. The current problem with testing for Magic Carpet authentication is that the user auth information (screen name, service type, etc) is available only for the first request to the web server. I have sent my configuration files to the vlsupport team, but no resolution, yet.

<p>3. Started making modifications to the Merchant Comparison module to include local store information.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

<html>

Escalations

None.

Accomplishments

Product Page Print & Email

Installed Search code on development server. Still some issues with
 the cache database. Continued setting up the development environment.

Worked on the Mail Handler backend code.

Met with QA team to help develop test plan.

Engineering and QA participated in the finalized UI review.

Local Store

Discussed merchant feed handling strategy with Steve and Yogi. Came up with a workable plan. Need to write down the plan and do a sanity check with others in the divlet and with DCI.

Discussed including Local Store locator on A-Z pages. The Dulles team doesn't want to spend a lot of effort into this. They agreed to include a simple store search widget.

Got familiar with the Merchant Compare code and started coding the local store UI.

Engineering and QA participated in the finalized UI review.

Shopping Widget

QA wrote first draft of the test plan.

Continued working with the P13n folks on the widget implementation details.

Reviewed Shop@Anywhere project requirements with Ops.

Issues

DCI relationship still requires very close management. No need to escalate yet.

Ops raised some issues with our plan to scrape the "store specials" from the department pages. David Habib promised to work with us on this issue and on hardware requirement.

Next week

Product Page Print & Email

Finish setting up development environment.

Try to finish Mail Handler back end.

Local Store

Get agreement from everyone involved on the merchant feed handling. Come up with a plan for implementing the necessary changes to the Tools and feed processing.

Make progress on Local Store UI development.

Widget

Resolve Ops issues.

Meet with P13n QA folks to determine the Widget QA environment and responsibilities.

Resolve open issues with the P13n engineering team.

<html>

<h3>

Status for week ending 3/27/2001</h3>

1. Testing still underway for Shopping List Release 1.1 on QA server. It turned out that the VL5 headers were not initially turned for the cs.com alias of the server. Currently, VL5 authentication works for both web users and in-service users (AOL and CS).

<p>We just noticed another problem, initially reported by the CTA team, where if two users sign in from a web browser in succession, the second user is authenticated as the first user!

<p>I have informed the vlsupport team of the problem. The installation of the new release of Shopping List on production servers is likely to be delayed, pending investigation of the problem.

<p>2. The Merchant Comparison module is modified to work with a text database of the local store merchants. Both the grid version and standard-html version of the MC are working now. We are awaiting the activation of the proximity search interface at DCI so that we can start sending queries to DCI to look up local stores.

<p>3. Reviewed and provided feedback for the QA Test plan for Local Stores.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

<h3>

Status for week ending 4/2/2001</h3>

1. Implemented a workaround for the recently found bug in VL5 plugin. If two users sign in from a web browser in succession, this bug results in the second user being authenticated as the first user. The problem is caused by a authentication cookie set by the VL5 plugin when the first user logs in; this cookie is not regenerated when a second user logs in, but is instead reused, resulting in the second user being authenticated as the first.

<p>The workaround clears the VL5 cookie during logout from Shopping List; a new cookie is then generated by VL5 when a new user logs in. After this workaround is tested on QA server, installation of Shopping List Release 1.1 on production servers will be scheduled.

<p>2. I started installing and running the Search service on a new UltraSparc machine; I could not run Search on my Sparc20 system, landscape, because Search software requires UltraSparc systems.

<p>The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise Ids for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Continue testing of VL5 plugin.

2. Work on implementation of Local Stores.

3. Support CTA Banner service and Shopping List.</html>

Shop@Anywhere weekly engineering status

4/4/01 - 4/10/01

<p>Local Store

<p>Escalations

None

Accomplishments

Have a working prototype of the local store grid in Product Page:

http://

landscape.web.aol.com:2300/Store_Locator_Demo.html.

It includes all the logic necessary in Search and Merchant Compare.

It uses a stub DCI page for now, pending the availability of the DCI URL to be live. It also doesn't include any of the datamart changes. The list of merchants with local stores are stored in a text file for now.

Continued working with DCI on finalizing the merchant feed spec.

Issues

Need to get better closure on technical issues. The feed spec needs to be finalized soon.

Still don't have the URL spec that has all the parameters we need to pass to DCI.

Next week

Get agreement on the merchant feed spec.

Work with UI team to finish the local store grid.

Work on first drop to QA. Need to decide if we want to wait a few days for the DCI URL to go live.

Shopping Widget

<p>Escalations

None

<p>
Accomplishments

Made changes to the XML feed based on input.

P13n team working on the Widget PSP.

Didn't have a chance to put in writing the hosting solution that Ops signed

off on. This will need a change in the image urls generated by the Extractor, since in the proposed solution the images would be server from the MyAOL servers.

Issues

There was some suggestion from Kathleen May that the image specials may be replaced with text spacial in a future redesign of the department page. This will be a problem since, as designed, we are currently scraping image specials only. Kimberly Blessing doesn't think that this change would happen anytime soon. But, we need to have a plan to deal with this possibility, before we lose the services of the widget bullet engineers.

There are some technical issues on the PSP that need to be resolved soon.

Next week

Resolve the PSP technical issues.

Have a plan for handling the text only specials.

Try to finish Netcool error handling.

Product Page Anywhere

<p>Escalations

None

Accomplishments

Spent most of the time on integration testing with Search and VL5.

Issues

QA would like to have a drop soon.

Next week

The first QA drop.

Review QA test plan.

<h3>
</h3>

<h3>

Status for week ending 4/17/2001</h3>

1. There were a couple of problems with the configuration of VL5 on the Shopping List production servers, that resulted in the in-service users not being authenticated. After fixing the configuration, the release 1.1 of Shopping List is working fine with VL5 authentication for both VL5 and web users.

<p>2. The code for Local Stores is ready to be checked in. We are currently debating the the correct location for the checkin; on a branch of the CVS source or on the tip, after backing out the latest changes to database schema. The datamart and cache modules built from the tip of the CVS source require updates to the Datamart and DB schema on the QA and production servers.

<p>Completed printer-friendly version of the MC and LS tables.

<p>The DCI team has not yet implemented the proximity search interface and are also yet to send us the DCI Franchise Ids for the initial list of Local Store merchants.

<h4>

Next Week:</h4>

1. Deliver a release of Search and Datamart modules to QA for testing of Local Stores.

2. Support CTA Banner service and Shopping List.</html>

Shopping Widget

<p>Escalations

None

Accomplishments

The Extractor code committed to CVS.

Did first drop to QA.

Fixed error handling and added Netcool logging.

Reviewed the impact of text only specials and we are able to handle them fine.

Met with the P13n core team to discuss multi brand support. Also, discussed support for the widget after the widget bullet team moves on to their next project in mid May.

Issues

The widget bullet folks are strapped for resource. They can only commit 1 day a week for the shopping widget. They expect to be able to devote more time after the end of April.

The P13n core team needs to take on the shopping widget. (We have already brought it up with them)

Next week

Fix any problems found by QA.

Resolve multi brand support.

Product Page Anywhere

<p>Escalations

None

Accomplishments

First drop to QA done, with both email and print features available.

Issues

none

Next week

Fix bugs found in QA.

<h3>

Status for week ending 5/8/2001</h3>

1. Modified Cache client code to use the new merchant and brand tables.

Added new stored procedures for the tables.

2. Modified the implementation of local stores to the use the new tables.

The code is not checked in; the export/import mechanisms need to be updated to include the new tables.

3. Fixed bug #538208 (set error status when second commit fails).

<h4>

Next Week:</h4>

1. Coordinate the checkin of the DB schema changes for Search 2.1 release.

2. Deliver a release of Search and Datamart modules to QA for testing of Local Stores.

3. Support Shopping List.</html>
